SCOPE OF WORK

Note to Bidder: Quotation should anticipate all work, materials, equipment, labor, and incidental cost as required per the Scope of Work

Hydrodemolition Bridges A2595 & A2596 Route Z, Lincoln County

Scope of Work:

The scope of work includes hydrodemolition of designated portions of two bridge decks as marked in the field. Both bridges are on Route Z, northwest of Silex, Mo, in the northwest quadrant of Lincoln County.

The estimated area of concrete demolition is approximately 2000 square feet per bridge. The work within this quotation is to provide only for the hydrodemolition of the marked areas of the deck as a patching type operation. It is imperative that the work progress in an efficient manner to insure the work for this job is completed within the prescribed period so that concrete repairs can be made.

The contractor shall supply a self-propelled robotic hydrodemolition machine, with operator(s), for the purpose of removing unsound and sound concrete from the bridge deck as designated. The existing areas to be repaired will be scarified with a roto-mill (by MoDOT) to provide a roughened surface, prior to the hydrodemolition process. The contractor will cut and remove all deteriorated deck concrete within the prescribed area with hydrodemolition equipment.

The equipment must demonstrate the ability to achieve the desired cutting depth. The resulting surface shall be one that is roughened and highly bondable, and free of surface delaminations. If the demolished surface contains delaminations the contractor may be asked to provide additional treatment at his own expense.

The contractor shall supply all labor, equipment and tools necessary to perform the hydrodemolition operation, including a water source and all associated hoses and connections needed to run water from the supply tank to the hydrodemolition equipment. MoDOT will supply the runoff / erosion control for the hydrodemolition operation.

The contractor shall be responsible for cleaning up all rubble and debris left behind in the hydrodemolition operation. This shall be done in a manner that does not damage any exposed reinforcing steel and shall progress with the hydro process. Upon clean up of all rubble, the deck patch areas shall be thoroughly washed down by the contractor. MoDOT will provide a truck to haul off rubble at the job site, if the debris is unloaded into the truck bed by the contractor. Or, the contractor can collect and dispose of the material at a maintenance facility, as directed.

SCOPE OF WORK

Page 2

Traffic control will be provided by MoDOT and includes a total closure of the work area while work is progressing. The work time for hydrodemolition will be as coordinated with MoDOT. The cutting and clean-up must be completed in a maximum of two days, at each bridge. It is imperative that the hydrodemolition work and clean-up be accomplished as quickly as possible at the site so that pouring of the patches can be quickly accomplished during the same lane closure period.

Payment will be made by the square feet for hydrodemolition, as measured in the field. A mobilization pay item will be included as one lump sum separate from hydrodemolition.
