Sec 720 - Mechanically Stabilized Earth Wall Systems

Combination Wall Systems shall be considered Small Block Wall Systems

The project contractor may also select from the following lists of pre-qualified geogrids and pre-qualified wall facings to produce suitable design plans and details for a combination wall system at a specific location. The contractor shall be responsible to verify compatibility and strength of the proposed combination geogrid and wall facing elements before submitting the professional engineer sealed plans for each wall on a project. Verification shall include but not be limited to obtaining and verifying certification of test results for the combination of components being used. Mixing of individual components from different manufacturers will not be permitted.
