1.0 Introduction

The Missouri Department of Transportation (MoDOT) is beginning a Second Tier Environmental Impact Statement (EIS) for I-70 in Kansas City, Missouri beginning from west of The Paseo interchange to east of the Blue Ridge Cutoff interchange. This portion of I-70 spans approximately 6.8 miles and currently serves:

- Kansas City, Missouri
- Local and Regional Business and Industry
- Interstate and International Freight Movements
- Neighborhoods
- Commuters
- Surrounding Cities

Figure 1 shows the Study Area is attached at the end of this document.

The I70 Second Tier EIS in Jackson County, Missouri is following a tiered environmental documentation process. The first tier documents address broad programs or overall corridor strategies and issues in an initial, higher level environmental analyses. The first tier documents frame and narrow the scope for second tier studies and related decisions. More specific proposals and impacts will be analyzed in this second tier study. The tiered process enables a decisionmaking process that focuses on issues that are ready for decision, allowing the project to move forward, and reduces repetition in environmental documentation.

In April 2011, the First Tier EIS identified a Selected Strategy to improve the I-70 corridor. The Selected Strategy is the Improve Key Bottlenecks Strategy from the downtown loop to east of I-435. From east of I-435 to I-470, the Selected

The public involvement program will focus on achieving quality public participation that brings people together.

Strategy is either the Improve Key Bottlenecks Strategy or the Add General Lanes Strategy.

The First Tier EIS recommended that for the second tier environmental studies, the 18-mile I-70 corridor be divided into five sections of independent utility (SIU). Each SIU will be evaluated to the appropriate level of detail (CE, EA, or EIS) within the National Environmental Policy Act process.

The effective public involvement tools and techniques from the First Tier EIS will be carried forward into the Second Tier EIS. Some of these tools and techniques include mailing lists, mobile Voice Van meetings, and an increase availability of on-line/web comment opportunities.

Study Team refers to Federal Highway Administration (FHWA), MoDOT, and its consultant team led by CDM Smith with HNTB Corporation, Vireo, Archaeological Research Center, and Hg Consult. The Study Team will:

- Examine the purpose and need and the selected strategy developed during the I-70 First Tier EIS.
- Narrow the list of initial alternatives and create a set of reasonable alternatives for second tier evaluation.
- Use a set of traffic, engineering and environmental criteria to evaluate the reasonable alternatives.
- Recommend a single preferred alternative.
- Complete required EIS documentation.

The planning process is anticipated to be completed in 2014 with the Final Second Tier Environmental Impact Statement and Record of Decision.

Since the FHWA is expected to provide funding for this project, FHWA serves as the lead federal agency for the

April 2012 Public Involvement and Agency Coordination Plan

project. MoDOT, as the direct recipient of Federal funds for the project, is the joint lead agency and will make decisions in coordination with FHWA.

Section 6002 of the Safe, Accountable, Flexible, Efficient Transportation Equity Act – A Legacy for Users of 2005 (SAFETEA-LU) requires that the lead agencies establish a plan for coordinating public and agency participation and comment during the environmental review process.

This document outlines the plans and process for the Study Team to achieve public participation and agency coordination as required by Section 6002 and other National Environmental Policy Act (NEPA) and MoDOT requirements. Per Section 6002, this Public Involvement and Agency Coordination Plan will be circulated to potential cooperating and participating agencies and other stakeholders for review and comment.

The public involvement process for the I-70 Second Tier EIS will focus on achieving quality public participation that brings people together to resolve issues, establishes communication between diverse groups, and finds solutions to problems. It will also:

- Outline the community involvement process with targets and reminders as to what is happening at each phase of the project.
- Identify key contacts with agencies, the news media, citizen groups, and the general public.
- Explain the various methods and media to be used throughout the process including the basic information to be included with each.
- Include a contact list and the communications protocol to be used with stakeholders, especially for

A truly effective public involvement process gathers the right information from the right people at the right time using the most appropriate methods possible.

reaching minority, low income, elderly populations, and zero-vehicle households.

The Plan includes a statement of its goals and intent, an initial list of stakeholders, tools, an overview of the public and agency coordination involvement process, timing, key milestones and deliverables, and contact information for the Study Team. The plan will be placed on the project website and made available for public review and comment. The plan will be updated periodically to reflect any changes to the project schedule and other items that typically require updating over the course of the project.

2.0 Goals and Intent

A truly effective coordination process gathers the right information from the right people at the right time using the most appropriate methods possible. The information gathered is then used to refine the project in a way that assures the public that their input is valuable and makes the overall project better. The process supports the idea that public involvement should be timely, useful, and used. In keeping with this idea, goals for this I-70 Second Tier EIS Public Involvement and Agency Coordination Plan include:

- Identify early coordination efforts.
- Identify cooperating and participating agencies to be involved in agency coordination.
- Establish the timing and form for agency involvement in defining the project's purpose and need, the range of alternatives to be investigated, and impact assessment methodologies, as well as reviewing the preliminary Draft Second Tier EIS.

- Maximize stakeholder communication effectiveness with a wide range of local, agency, community and other public officials as stakeholders.
- Increase responsiveness to stakeholder key issues and concerns.
- Establish timing and form for public opportunities to be involved and commenting during the study process.
- Describe the communication methods that will be implemented to inform the community.
- Develop a process that achieves informed public consent regarding the project and its outcomes.

3.0 Public Involvement Process

This section outlines the activities that will constitute the public involvement process for the I-70 Second Tier EIS.

3.1 Community and Neighborhood Stakeholders

Stakeholders are individuals and groups who are affected by or have an interest in a particular project or action. A wide variety of stakeholders make up the Study Area including property owners and residents, community groups, business groups, commuters, developers, utility companies, school districts, umbrella organizations (chambers of commerce, neighborhood associations, etc.), and the general public. (*List of I-70 Second Tier EIS stakeholders by area and organization is in **Appendix A***). The list of community and neighborhood stakeholders will be updated as new stakeholders are identified or stakeholder contact information changes.

3.2 Public Involvement Tools

Printed materials, the internet, a variety of meetings, a central point of contact, and the media, will be used to share information about and gather feedback for the I-70 Second Tier EIS. The use of each of these tools will be coordinated to ensure that each truly:

- **Informs** the community about the project, the project's timeframe, known challenges, what decisions need be made, and how the project will impact residents, businesses, and communities.
- **Helps develop a relationship** for the development of the second tier environmental document.
- **Solicits community input** on the purpose and need, constraints, issues, concerns, and ideas for making the project effective in terms of transportation, on concepts, and on alternatives.
- Gains community understanding, support, and **advocacy for project funding and implementation.**

Newsletters like the MoDOT Kansas City District newsletter for Route 71 will provide project updates and information.

A mailing/e-mailing list and a public involvement log will also be kept for the project and the Public Involvement Plan will be updated as necessary. Descriptions of the vision, purpose, and implementation method for each tool are included below.

- **Printed Materials:** A graphic concept that consists of the MoDOT logo and designated colors and fonts will be applied to all printed materials developed for the project, including newsletters, slideshows, and more.
 - ✓ The **newsletters** will set the overall graphic look and identity for the project as well as provide project information. Four newsletters will be designed and distributed for the project and

describe Initial Alternatives, Reasonable Alternatives, Draft EIS Document, and the Final EIS Document. The newsletters will be produced in English/Spanish and be four pages in length.

- **Interactive Web Meetings:** The Study Team will develop up to five web interactive meetings for various points in the project (Purpose and Need, Initial Alternatives, Reasonable Alternatives, Draft EIS Document, and the Final EIS Document). Each meeting will be posted on the project web page as an on-line presentation. The design of the meetings will be compatible with www.MindMixer.com formats. The on-line, interactive web meetings will include links to MindMixer to afford on-line viewers the opportunity to comment and develop discussion threads related to the content presented. The KC Scout message boards will be used to communicate web meetings to commuters, freight haulers, and other users of I-70.
- **On-line Inquires:** On-line comments submitted via the interactive meetings, on-line surveys, and MindMixer will be acknowledged upon receipt by MoDOT and responded to by the Study Team within two business days.
- **Web Site:** A project webpage for the I-70 Second Tier EIS will be designed for the MoDOT website. Project materials, meeting invitations, meeting results, and more will be available on the site so that the general public can view and download the information. The webpage will be located on the MoDOT Kansas City District site. It will also be linked to www.MindMixer.com as described above. The website will also include an overview of the project that describes existing conditions and the purpose and need. In addition, educational and informational materials about the National Environmental Policy

A project website will be designed for the I-70 Second Tier EIS project.

Act process, maps, MoDOT contact information, a speaker request form, frequently asked questions, news releases, and meeting invitations will be included on the page. The page will be located at www.modot.org/kansascity/metroi70.

- **Meetings:** A number of different types of meetings will be held throughout the project including briefings for stakeholders and public officials, information meetings, and a public hearing.
 - ✓ Three **listening posts** will be organized and coordinated to share project information with the public and gather their feedback. Postcard invitations that advertise each of the listening posts will be mailed to stakeholders in advance. The invitations will include KCATA-provided information about how to take public transit to the meetings. Each listening post will be held at separate stages during the project: Purpose and Need, Initial Alternatives, and Reasonable Alternatives. Recording services will be provided and the meetings will be interactive and formatted as open houses.
 - ✓ A **Community Advisory Group (CAG)** will be established for the project. MoDOT will coordinate and manage this diverse citizen-based group of up to 14 individuals with interest in the study. CAG members will represent key governmental and civic groups and serve as liaisons between those groups and MoDOT. The members will be appointed by the government and civic groups involved and their participation in the CAG will be considered voluntary. Twelve (12) CAG meetings are planned over the 30-month life of the project. CAG meetings are anticipated to last approximately 2 hours and project information will be provided at each to assist CAG

members with making informed recommendations about the project. CAG members will also help MoDOT inform the public and key stakeholders about the project.

- ✓ A **Community Connections Team** will be established for the project. The team will consist of specialists in public involvement, environmental analysis, and engineering. The Team will reach out to neighborhoods, businesses, community organizations, associations/councils, and elected officials throughout the Study Area. The Team will conduct up to five rounds of speaking opportunities related to Purpose and Need, Initial Alternatives, Reasonable Alternatives, Draft EIS Document, and Final EIS Document. The notes from each of the five rounds will be posted on the project website.
- ✓ A series of **Interactive MoDOT Mobile Meetings** will be used to share information about the alternative packages and preferred alternative with the public. MoDOT will use its existing Voice Van, tent, display board, exhibits, and backdrop for the meetings. The Voice Van should be stationed for two-hours at the following key events:
 - 18th and Vine Street Juneteenth Celebration
 - Blue Valley Neighborhood
 - Key bus stops and shopping destinations
 - Community centers
 - Libraries

As part of the meetings MoDOT will staff an information table that provides information about the project to interested stakeholders. The Study Team will also circulate the event location to talk

A **Community Connections Team** will provide informational speaking opportunities to update Study Area organizations, associations, and groups on the project's progress.

Interactive mobile meetings will reach out to the public at community locations and events they commonly attend such as community centers, libraries, bus stops, and festival celebrations.

with members of the public about the project and distribute “Contact Us” business cards and/or bracelets. Door hangers will be developed in English/Spanish with project contact information and advertising the website. The distribution of the door hangers will correspond to Mobile Meeting sites.

A public hearing provides an open house setting for the public to learn, provide feedback, and discuss the project with the Study Team.

- ✓ A **location public hearing** is required by the National Environmental Policy Act (NEPA) for all projects being evaluated with an Environmental Impact Statement (EIS). The location public hearing for the I-70 Second Tier EIS will be held at one location in the Study Area. Quarter-page display ads will be placed in five local newspapers that together reach the general public and ensure all groups have access to the hearing. In addition, ten English/Spanish 30-second radio spots will run the week before the hearing, Spanish translator will be provided at the public hearing, and a court reporter will document oral public comments for the hearing. Draft responses to substantive comments will be created for inclusion in the location/environmental document. Final responses will be included with the final environmental document.
- ✓ **Spanish Translators** will be available at the Listening Posts and the Public Hearing as the key language group other than English identified in the Study Area.
- **Central Point of Contact:** The MoDOT Kansas City District phone number (1-888-ASK-MODOT (275-6636)) will be used as the phone number for the project. MoDOT’s Kansas City District office (600 NE Colbern Road, Lee’s Summit, Missouri 64086) address will be used as the mailing address for the project.

- **Mailing List:** A Master electronic mailing list will be updated from the I-70 First Tier EIS and used for this Study. The list will be maintained and updated throughout the Second Tier EIS. It will contain community groups, property owners, interested residents, agencies, local officials, and state elected officials. Key stakeholders and public officials will be identified appropriately on this list. All interested parties will be encouraged to add their names to the electronic mailing list.
- **Media:** An Introductory Media Kit will be produced that contains project information, an introduction to the environmental planning and NEPA processes, the difference between a First Tier EIS and a Second Tier EIS, corridor maps, a contact list, and other material as deemed appropriate by MoDOT Kansas City District Customer Relations.
 - ✓ **Media Advisories and Releases:** MoDOT Kansas City District Customer Relations will develop and distribute Media advisories and releases.
 - ✓ **Media List:** MoDOT Kansas City District will maintain a media list.
- **Public Involvement Log:** A Public Involvement Log will be maintained for the project. It serves as a filing structure that is intended to allow for the summary of public correspondence for the comments and coordination in the environmental document.
- **Public Involvement Plan:** The plan will be updated as warranted.

An Introductory Media Kit will be produced that contains project information, an introduction to the environmental planning and NEPA processes, the difference between a First Tier and Second Tier EIS...

4.0 Government Relations

This section outlines the government relations process for the I-70 Second Tier EIS. The details of the government

relations process can be seen in the Government Relations Plan.

4.1 Government Relations Stakeholders

Elected officials, their staff and employees of political jurisdictions potentially affected by the I-70 Second Tier EIS constitute a stakeholder subset for focused engagement. They represent broad ranges or coalitions of individual/group stakeholders that share geopolitical or subject-matter interests. These stakeholders include (but are not limited to) those individuals who politically represent the project area, including as appropriate the mayor and city council of Kansas City; the Jackson County Executive and members of the Jackson County Legislature; the local delegation of the Missouri General Assembly; and members of the local Missouri Congressional delegation. By exercising their constitutionally or legislatively assigned responsibilities, these stakeholders can substantially alter the conditions under which the EIS is conducted or the issues it is studying. Finally, these stakeholders may desire or be called upon in the long term to make decisions or investments that coordinate – or not conflict with – EIS recommendations accepted by the community and its partners, the FHWA and MoDOT.

4.2 Government Relations Approach

The I-70 Second Tier EIS will employ a government relations approach designed to create meaningful project-related learning and input opportunities for potentially affected elected officials, staff and employees of political jurisdictions. This will be done by working with government relations stakeholders to:

- Educate them about the EIS process, purpose, activities, schedule and potential impacts;
- Provide them with the information they need to respond to anticipated or actual EIS-related constituent questions or concerns;
- Keep them informed of EIS progress and milestones; and
- Offer them formal and informal opportunities to provide personal or constituent input about the EIS and specific issues under study.

This approach and the engagement tools discussed in the following section will be refined on an ongoing basis, beginning with the results of an initial government relations planning session to be held with MoDOT and members of the project team. This meeting is intended to produce a more expansive stakeholder and government relations plan that will detail the following elements: (1) project description, (2) situational assessment, including key areas of public concern and interest and potential issues; (3) stakeholder and government relations goals and objectives; (4) a matrix of key stakeholders and target audiences; (5) key messages (6) strategy, tools and techniques; (7) schedule; and (8) MoDOT review and approval process.

4.3 Government Relations Tools

Government relations stakeholders will be engaged through face-to-face meetings, social media, printed materials and other tools created specifically for them or as part of the public involvement process. In all cases, the format, content and timing of government relations engagement tools will be coordinated with the project's public involvement tools to ensure stakeholder communication consistency. Specific government relations tools to be used include:

- **Stakeholder and Government Relations Comment Tracker Database** – Government relations stakeholders, contact information, interactions and their issues/concerns will be captured in a searchable, exportable database that will enable the project team to collect and visually present and analyze government relations stakeholders' locations, concerns and feedback throughout the project.
- **Civic and Elected Official Briefings and Support** – Up to 36 briefings or presentations will be made to local, state and federal elected officials or civic organization leadership. It is anticipated that three rounds of briefings will occur during the EIS and their timing will be coordinated with the overall schedule for the EIS and its key project milestones for 1) Purpose and Need, 2) Initial Alternatives, 3) Reasonable Alternatives, 4) Draft EIS Document and 5) Final EIS Document milestones. In support of the briefings, existing or new background materials will be created to help government relations stakeholders better understand the study and its goals and processes. These materials may include new or modified existing fact sheets on up to 8 specific study topics of interest to these stakeholders, along with up to three PowerPoint presentations.
- **Pre-Meeting Walk-Thru** – Prior to each public meeting, government relations stakeholders will be provided an opportunity for an informal briefing on the information and materials to be presented. This will familiarize the government relations stakeholders with the content being presented and help them better connect constituents who may have questions or concerns with the Study Team members.

5.0 Agency Coordination as Required by Section 6002 of SAFETEA-LU

The I-70 Second Tier EIS study will follow the guidelines for agency participation as stated in the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU). The Study Team will follow the guidance from FHWA for compliance with the public participation provisions of SAFETEA-LU.

SAFETEA-LU identifies three different types of agencies for coordination along with the general public: cooperating agencies, participating agencies, and other stakeholders (usually private sector associations or groups). Early in the I-70 Second Tier EIS project, the Study Team will identify key federal, state, and local stakeholders with whom coordination is needed and determine their likely level of involvement.

A Notice of Intent to initiate the Second Tier EIS was published in the Federal Register on December 23, 2011. This was the first step in the agency (and public) coordination process. Coordination letters were prepared and distributed to stakeholder agencies notifying them of the study and requesting their involvement. The letters described how the study would be conducted to fulfill Section 6002 of SAFETEA-LU and other NEPA requirements and identified the agencies potential involvement as a cooperating or participating agency. The Study Team also scheduled a meeting with cooperating/resource agencies on February 7, 2012 to review the project. The letter and meeting are meant to fulfill the scoping activities point of collaboration.

5.1 Cooperating Agencies

Cooperating agencies are those governmental agencies specifically requested by the lead agency to participate during the environmental evaluation process for the project. FHWA's NEPA regulations (23 CFR 771.111(d)) require that those federal agencies with jurisdiction by law (with permitting or land transfer authority) be invited to be cooperating agencies for an EIS.

The United States Army Corps of Engineers was invited to serve as a formal cooperating agency for the I-70 Second Tier EIS; however, they elected to be a participating agency. If new information reveals the need to request another agency to serve as a cooperating agency, then MoDOT in consultation with FHWA will issue that agency an invitation.

5.2 Participating Agencies

SAFETEA-LU (Section 6002) includes a category of agencies to participate in the environmental review process for EISs. These are federal and non-federal governmental agencies that may have an interest in the project because of their jurisdictional authority, special expertise and/or statewide interest. All federal, state, regional, and local government agencies that may have an interest in the project will be invited to serve as participating agencies. Non-governmental organizations and private entities cannot serve as participating agencies. Thirteen agencies were invited to become participating agencies and nine agencies accepted. If, during the progress of the project, new information indicates that an agency not previously requested to be a participating agency does indeed have authority, jurisdiction, acknowledged expertise or information relevant to the project, then MoDOT, in consultation with FHWA,

will promptly extend an invitation to that agency to be a participating agency.

The roles and responsibilities of participating agencies include, but are not limited to:

- Participating in the NEPA process starting at the earliest possible time, especially with regard to the development of the purpose and need statement, range of alternatives, methodologies, and the level of detail for the analysis of alternatives.
- Identifying, as early as practicable, any issues of concern regarding the project's potential environmental or socioeconomic impacts. Participating agencies also may participate in the issue resolution process described later in this guidance.
- Providing meaningful and timely input on unresolved issues.
- Participating in the scoping process.
- Reviewing and providing comment on the preliminary version of the Draft Second Tier EIS.

Accepting the designation as a participating agency does not indicate project support and does not provide an agency with increased oversight or approval authority beyond its statutory limits, if applicable. Cooperating agencies are, by definition, participating agencies, but not all participating agencies are cooperating agencies. The roles and responsibilities of cooperating and participating agencies are very similar, but cooperating agencies have a slightly higher degree of authority, responsibility, and involvement in the environmental review process.

Comment periods for the public or participating agencies will not exceed 30 days unless a different comment period is established by the Study Team, project sponsor, and all participating agencies. The exception is the location public hearing which is required to have a minimum 45 day comment period.

5.3 Other Stakeholders

There are several agency stakeholders that will not be designated as participating or cooperating agencies but will be provided the opportunity to comment on the key project documents. Local interests groups may include Chambers of Commerce, Economic Development Councils, and other local groups. At the state and Federal level, these agencies may include Missouri Federal Clearinghouse, Department of Energy, Centers for Disease Control and Prevention, and Federal Railroad Administration. Other stakeholders generally include state and U.S. Senators and Representatives; however, many of these stakeholders will be involved through the government relations effort described in **Section 4**.

5.4 Collaboration Points and Cooperating and Participating Agency Protocols

SAFETEA-LU incorporates changes aimed at improving and streamlining the environmental process for transportation projects. Lead and participating agencies have legal and general governmental obligations to work cooperatively to improve the environmental review process. The roles and responsibilities specified in Section 6002 for lead agencies and participating agencies form a part of those obligations.

Lead and cooperating agencies for the project must agree that the project may move forward at key points including the impact assessment methodologies, purpose and need,

Reasonable Alternatives carried forward, preliminary Draft Second Tier EIS, and Final Second Tier EIS. Cooperating agencies may also be asked to review key technical memoranda that deal with their expertise/jurisdiction. Cooperating agencies have special authority or expertise regarding certain aspects of the project.

Participating agencies may also be asked to review deliverables and provide feedback at the same collaboration points, including impact assessment methodologies, purpose and need, Reasonable Alternatives carried forward, preliminary Draft Second Tier EIS, and Final Second Tier EIS. The Study Team will address comments received from participating agencies before finalizing documents for official approval.

Coordination between the Study Team and cooperating and participating agencies will take place as follows:

- The Study Team will submit written requests for reviews and concurrence on major documents, as listed above, and request that the cooperating and participating agencies complete their reviews of major documents within 30 days.
- The Study Team will distribute material to federal agencies.
- The Study Team will provide all state and local agencies with notices and materials for review.
- Comments from the cooperating and participating agencies are to be provided in writing, although meetings and/or phone calls may also be held with representatives from the cooperating and participating agencies to supplement these comments.
- In order to facilitate the timely review of key documents, the Study Team will continue to keep the cooperating and participating agencies apprised of

the project schedule and notify them well in advance when they can expect to receive documents for review.

5.4.1 Collaboration on Impact Assessment Methodologies and Coordination Plan

The I-70 Second Tier EIS in Kansas City, Missouri is following a tiered environmental documentation process. The first tier documents address broad programs or overall corridor strategies and issues in an initial, higher level environmental analyses. More specific proposals and impacts will be analyzed in the second tier studies. The tiered process enables a decision-making process that focuses on issues that were ready for decision and reduces repetition in environmental documentation. The first tier documents frame and narrow the scope for second tier studies and related decisions.

The assessment of impacts for different categories in the I-70 Second Tier EIS will follow the FHWA Technical Advisory T6640.8A Guidance for Preparing and Processing Environmental and Section 4(f) Documents and other relevant FHWA and MoDOT guidance as appropriate. As this is a second tier document, the protocols, requirements and commitments established by the previous I-70 First Tier EIS completed by MoDOT will be drawn upon. A separate methodologies summary will be provided for agency review and coordination along with copies of this coordination plan.

The output of this collaboration point should include input from the participating agencies on:

- The Proposed Impact Assessment Methodologies Memorandum;

- The Public Involvement and Agency Coordination Plan.

Additionally, the agencies should provide input on environmental features, resources, and issues of concern.

5.4.2 Collaboration on Purpose and Need

A draft Purpose and Need Statement will be developed by MoDOT. Based upon comments received during the scoping period from agencies and the public, MoDOT will prepare and forward to the participating agencies the revised purpose and need statement.

The output of this collaboration point should include input from the participating agencies on:

- Purpose and Need Statement;
- Study Area of the project.

Additionally, the agencies should provide further input on environmental features, resources, and issues of concern if new issues have arisen.

5.4.3 Collaboration on Initial Alternatives

A description of the initial alternatives for the Second Tier EIS will be developed by the Study Team. The Study Team will forward to the participating agencies.

The output of this collaboration point should include input from the participating agencies on:

- Initial Alternatives.

The lead agencies will revise the range of initial alternatives after considering input from the agencies and the public. These project decisions made by the joint lead agencies are to be made at the "collaboration point".

5.4.4 Collaboration on Reasonable Alternatives Carried Forward

Based on the output of the previous collaboration points as well as the public meetings on purpose and need/initial alternatives analysis conducted during the project development process, MoDOT will prepare a "initial alternatives to be evaluated" information packet. This information to be forwarded to the participating agencies may include the following:

- Revised Purpose and Need Statement and Study Area;
- Results of the initial alternatives analysis and environmental screening (based on existing data sources and GIS inventories);
- Description of any other factors, besides purpose and need that will be considered in the screening of alternatives, such as cost and environmental factors;
- Any updates to the coordination plan;
- A summary of all reasonable alternatives to be carried forward and evaluated for their anticipated effectiveness in addressing the purpose and need of the project, as well as a map showing the location of the initial alternatives.

The output of this collaboration point should include input from the participating agencies on:

- The Reasonable Alternatives to be carried forward into the Draft EIS;
- The revisions to the Purpose and Need Statement, if applicable;
- The revisions to the coordination plan, if applicable.

The lead agencies will decide on the range of reasonable alternatives after considering input from the agencies and the public. These project decisions made by the joint lead agencies are to be made at the "collaboration point" and are not required to be revisited later in the project if concerns are expressed later on.

5.4.5 Collaboration on Preliminary Draft Second Tier EIS

Based on the output of the previous collaboration points and the subsequent detailed investigation of initial alternatives and analysis of impacts, MoDOT will prepare a Preliminary Draft Second Tier EIS document. Cooperating agencies will be sent a copy of the Preliminary Draft Second Tier EIS for review. MoDOT will inquire of participating agencies interest in reviewing and commenting on the Preliminary Draft Second Tier EIS document.

The output of this collaboration point should include input on the adequacy of the preliminary Draft Second Tier EIS. The agencies will be asked to specify whether additional information is needed to fulfill other applicable environmental reviews or consultation requirements. In addition, the participating agencies will specify any additional information needed to comment adequately on the preliminary Draft Second Tier EIS analysis of site-specific effects associated with the granting or approving by the agency of necessary permits, licenses, or entitlements. At this collaboration point, MoDOT will prepare the Draft

Second Tier EIS for submittal to FHWA for a concurrent review with the participating agencies.

Based on FHWA's approval of the Draft EIS for circulation, a Public Hearing will be conducted in accordance with NEPA requirements. The document will be made available for a minimum 45-day public and agency review period. Substantive comments will be addressed in the Final Second Tier EIS.

5.4.6 Collaboration on Final Second Tier EIS

Based on FHWA's approval of the Final Second Tier EIS, the Final Second Tier EIS will be made available for public and agency review for a minimum of 30 days. This period is the last period during which comments on the environmental evaluation process will be received from the public and agencies. Upon addressing the substantive comments received in the Final Second Tier EIS comment period, MoDOT and FHWA will prepare a request for a Record of Decision (ROD) indicating the Selected Alternative. FHWA approval of the ROD completes the NEPA process for the project.

5.4.7 Section 106 Early Coordination

The lead agency (FHWA) or its designee (in this case, MoDOT) may use its procedures for public involvement under the National Environmental Policy Act (NEPA) to satisfy the National Historic Preservation Act (NHPA) or Section 106 requirements for public involvement as well, providing they offer adequate opportunities for public involvement. The NHPA requires the federal agency or its designee to seek the participation and consider the opinions of interested and appropriate parties throughout the Section 106 process including the identification and evaluation of cultural resources potentially affected by the project, the

evaluation of project effects to historic resources, and the development of appropriate mitigation plans as needed. This “involvement” is referred to as “consultation”. MoDOT shall consider the nature of the project and the kinds of historic resources potentially affected to identify the appropriate individuals, organizations, and entities with whom MoDOT will consult. Because MoDOT considers Section 106 requirements early in the NEPA process, compliance with both statutes is coordinated throughout the project. As this is a Second Tier EIS Study, by the end of the project, all cultural resource surveys and evaluations will have been completed and agreement documents executed that identify measures to mitigate adverse impacts to historic resources.

5.4.8 Tribal Consultation

The Study Team will initially contact Tribal Governments that once resided in or near the Study Area or may have interest in the Study Area through government to government consultation letters. The Tribal Governments will be requested to confirm or decline further coordination related to the I-70 Second Tier EIS. In either case, the Tribal Governments will be afforded the opportunity to review the Draft Second Tier EIS document. Consultation meetings will be held if desired by the Tribal Government or if tribal related resources are identified during archaeological or other investigations.

5.5 List of Cooperating and Participating Agencies

A list of cooperating and participating agencies will be amended to this plan once letters are exchanged between the Study Team and the agencies involved.

5.6 Agency Coordination Meetings/Groups

All of the participating agencies for the project will be invited to participate in the Resource Agency Coordination Group, which will be the forum for discussion of environmental issues, coordination and impacts specifically with agencies with jurisdictions/interests in particular resources. Approximately six Resource Agency Coordination Group meetings will be held to provide project information and discuss key issues, including the meeting identified above. These meetings will be held in conjunction with major deliverable/concurrence points. Some of these meetings may be by video conference from MoDOT Central Office in Jefferson City, Missouri to facilitate agency involvement.

The second agency coordination team will be the Local Study Management Team, which will be the forum for local government agencies to provide greater technical input into the project. The Local Study Management Team will meet in conjunction with monthly project progress meetings. Representatives from Federal Highway Administration, Mid-America Regional Council, Kansas City Area Transit Authority, City of Kansas City, and MoDOT staff will be invited. Approximately 25 project progress meetings, staggered throughout the project, will be held to assist in sharing of information and enhance local input into decision making for the project.

6.0 Approach and Timing

Though there are a variety of tools included in the coordination, each will begin with an orientation as to where they fall in the scope of planning process, what the role of the participants and readers is, and what decisions can and cannot be made. During meetings information about the project including goals, participants involved, and the

overall planning process will be provided with a brief presentation using slideshows, boards and handouts as appropriate. Throughout the process MoDOT staff will be “the face” of the project and the consultant team will support them in every aspect. The entire public involvement process will be held over a two and a half-year long period ending in 2014. A public involvement activities schedule is attached at the end of this document.

6.1 Anticipated Key Milestone and Deliverable Dates for Agency Reviews and Comments

Figure 2 displays the I-70 Second Tier EIS schedule which provides a timeline for key coordination items to be delivered. This timeline will be updated as the project proceeds.

Figure 2: I-70 Second Tier EIS Schedule

Deliverable	Anticipated Date Agencies Receive Deliverable	Anticipated Agency Comment Due Date
Scoping Activities - Coordination Letter and First Agency Meeting	December 15, 2011 Letter, February 7, 2011 Meeting	
Agency Review and Comment on Draft Purpose and Need Document	March 2012	April 2012
Listening Post	April 2012	
Agency Review and Comment on Initial Alternatives	May 2012	June 2012
Listening Post	July or August 2012	
Agency Review and Comment on Reasonable Alternatives	November 2012	December 2012
Public Activities including Listening Post,	August 2012 - February 2013	

April 2012 Public Involvement and Agency Coordination Plan

Mobile Meetings, and Community Connections Team		
Agency Review and Comment on Preliminary Draft Second Tier EIS Document	July 2013	August 2013
Public Hearing	September 2013	
Agency Review and Comment on Final Second Tier EIS	March 2014	April 2014

8.0 Revision History

Identify changes to the Coordination Plan. Note: If a schedule was included in the original coordination plan and it is the item that requires modification, concurrence on the schedule change is required only if the schedule is being shortened and then only from joint lead agencies, not all participating agencies.

April 2012 Public Involvement and Agency Coordination Plan
