INTRODUCTION

Section 5311 of Title 49, United States Code herein referred to as 5311, provides operating assistance to public transportation systems in nonurbanized areas. A nonurbanized area is an area outside a city of 50,000 plus inhabitants and its densely settled fringe areas.

Eligible applicants of Section 5311 assistance must be either public bodies or private nonprofit corporations. Private for profit providers of service are eligible through purchase of service agreements with a local public body for the provision of public transportation services.

Section 5311 of Title 49, United States Code provides capital assistance to those systems providing general public services. Capital projects are funded at the ratio of 80 percent federal funds with 20 percent local match required.

This document contains the forms, certifications, and assurances necessary to apply for capital and operating assistance. The State Management Plan and Operator's Manual should also be reviewed for additional information. A copy of this document is available at the address shown below.
