

BRIDGES

McClure's bridge team has experience inspecting, designing, and repairing hundreds of bridges, including truss, suspension, steel beam, pre-stressed, concrete, metal arch, and concrete arch structures.

By maintaining a balanced focus on safety and fiscal responsibility, McClure has become one of the most experienced and reliable bridge designers in the region.

- , Bridge Design & Hydraulic Analysis
- , Construction Observation & Administration
- , Roadway, Utility, Pedestrian, and Temporary Bridges
- , Fracture Critical & Routine Inspection
- , Bridge Rehabilitation

WHO WE ARE + WHAT WE DO

McClure's area of expertise is in guiding its clients on making long-term capital investments. With a mission of building relationships for success, McClure provides engineering, planning, design, funding, and financial analysis to communities across the country. We have been making lives better since 1956 through transportation infrastructure, aviation infrastructure, structural services, land development, water environment, survey, construction observation, placemaking, and creative services. With a vision of making lives better, we strive to build a lifelong relationship with our clients. Currently, McClure employs 240 employees with offices throughout Iowa, Kansas, Missouri, Texas, and Oklahoma.

What differentiates McClure is our ability to provide comprehensive services while focusing on the personal, hands-on service our clients have come to expect. Each team member embraces our core values — integrity, kindness, innovation, commitment, and fun — and is committed to providing outstanding delivery of quality services, personal communication, and innovative and cost-effective design.
