March 2011

Prepared by Organizational Results  
Missouri Department of Transportation

## Tailgate Sign Rack

### Description

District staff fabricated a rack to hang on the back of the truck to haul signs, sign stands, easels and other equipment.

### Benefit

The rack installs quick by hanging it over the tailgate. Having the signs and equipment at a lower level eliminates lifting things into the back of the truck. This also speeds up the job because items are available for use at ground level.

### Parts and Labor

**Total: \$110**

**Labor: 12 hours**
