September 27, 2019

Dear Consultant:

The Missouri Highways and Transportation Commission is excited to have the opportunity to deliver a large number of bridge repair and replacement projects through the Focus on Bridges program and our STIP. To help us deliver these projects, we will be requesting the services of consulting engineering firms over the next couple of months for the attached list of projects. The project list is attached and includes the scope of services that may be required. The list also indicates which projects will be bundled together for design. The letting fiscal year is noted on the attached spreadsheet, however, the solicitations may indicate a delivery timeline that could be accelerated.

This list of projects does not represent all bridge repair and replacement projects that will need consultant services in the near future. The goal of this project list is to obtain consultant services for projects with an immediate need and projects we would like to have designed ahead of schedule and have "on the shelf".

These projects will be solicited through our standard solicitation process. The solicitations will have a contact for more information about the specific projects and solicitation. If you have questions about this letter, please contact Troy Hughes, (573) 526-2912 or [troy.hughes@modot.mo.gov](mailto:troy.hughes@modot.mo.gov).

Sincerely,

A handwritten signature in black ink, reading "Travis Koestner", is written over a horizontal line.

Travis Koestner, P.E.  
State Design Engineer
