

ADDENDUM NO. 1

ISSUED BY: BENTON & ASSOCIATES, INC.
2414 SOUTH FRANKLIN STREET
KIRKSVILLE, MO 63501

DATE: January 20, 2014

FOR: Mercer County Bridge 03300211
BRO-B065(32)
B&A NO. 13e2505

The attached revisions hereby supersede any and all data with which they may conflict as indicated on the Drawings, Specifications and related documents issued in the original set. Each trade is responsible for changes in its work caused by changes in the work of other trades. This addendum is a part of and shall be attached to the original set of plans and specifications for the work.

THIS ADDENDUM SHALL BECOME A PART OF THE SPECIFICATIONS NOTED ABOVE. RECEIPT OF THIS ADDENDUM SHOULD BE ACKNOWLEDGED ON THE BID FORM.

The purpose of this addendum is to provide clarity regarding the cast-in-place piling. The intent is for the piling to be consistent with the recommendations provided in the geotechnical report included in the Job Special Provisions.

All cast-in-place piling shall have a minimum wall thickness of 0.25" and have welded bottom closure plates that do not protrude excessively beyond the wall of the piling. The cast-in-place piling used for Bent #2 (near soil boring #1) shall have conical pile points. The cost of the closure plates and conical pile points shall be included in the unit cost of the 14" cast-in-place piling.

The bid opening date and time remains unchanged.

REMEMBER TO ACKNOWLEDGE THIS ADDENDUM ON YOUR BID FORM.
