

Company Profile

Brungardt Honomichl & Company, P.A., (BHC RHODES) was founded in 1992 by three young entrepreneurs with a mission to provide telecommunication customers with value-added engineering design services, all while giving back to their community and supporting higher education.

In 2001 the corporation began going through rapid change navigating the telecom bust. Over the next six years with careful strategic planning, BHC RHODES steered a course into new engineering territory adding public works expertise followed by development, traffic, stormwater and construction management services. During that time of growth and transition, the company merged with Rhodes Surveyors, Inc, a land surveying company based in Kansas, forming BHC RHODES.

Continuing upward growth momentum following the merger, BHC RHODES added LEED accredited expertise and a specialized 3D laser scanning surveying service, one of the first in the Kansas City area. By 2009 BHC RHODES expanded both Kansas office locations, opened a new office in Dodge City, Kansas and acquired the assets of two local engineering and surveying firms. The acquisitions expanded their land records library covering counties in Kansas and Missouri, placing BHC RHODES in top position of the largest land records owned in the Kansas City metropolitan area.

BHC RHODES has landed on numerous fastest growing company lists and has won best place to work honors. Most recently, BHC RHODES earned the title of Top Area Engineering Firms and Largest Engineering Firms in KC by Kansas City Business Journal and Best Firms to Work For by Zweig Group. Future plans include continuing their focus on giving back to the community and support of higher education with the Brungardt Honomichl & Company, P.A., engineering scholarship program at Kansas State University.

Company Wide Services

Development

Commercial/Retail | Destination & Entertainment | Education/Institutional | Healthcare | Landscape Architecture | Military/Government | Office/Industrial | Redevelopment | Residential/Multi-Family | Stormwater & Drainage | Sustainable Solutions | Traffic Impact Studies

Public Works

Smart Cities | Complete Streets | Construction Inspection | Construction Services | Corridor Studies | Design-Build | Flood Studies & Modeling | Funding Application Assistance | Infrastructure Planning | Intersection Design | On-Call Engineering Services | On-Call Inspection Services | Public Planning | Roundabout Design | Sanitary Sewer Design | Sidewalk & Trail Design | Stormwater & Drainage Design | Street & Highway Design | Street Lighting Design | Street, Storm & Sanitary Inventories & Ratings | Streetscapes | Traffic Engineering | Traffic Safety Analysis | Traffic Studies | Traffic Signal Design

Surveying

3D Laser Scanning | ALTA/NSPS Survey | As-Built Survey | Boundary Surveys | Construction Staking | Design Survey | Flood Elevation Certifications/LOMA | Gas Wells | Geodetic Survey | Mine Surveying | Platting | Route Survey/Right-of-Way Survey | Structure Monitoring | Surveys for Permitting | Technical Measurement/Accident Survey | Topographic Survey | Zoning/Rezoning

Utilities

Wireless | Long Haul Fiber | FTTx Design | Hut/Regen Site Development | Joint Use/Pole Analysis | Bidding & Construction Administration | Feasibility Studies | GIS | Inventory & Asset Management | Permitting & Environmental Coordination | Records/As-Builts | Right-of-Way & Surveying | Utility Coordination & Relocation

Firm Qualifications and Capabilities

BHC RHODES is experienced in large and small projects and we concentrate our experience in the following market service areas: **development, public works, surveying and utilities**. Each of these areas is led by seasoned professionals who can apply their knowledge to solve your problems.

Commitment to Schedule and Budgets

To achieve success, we utilize up-front project planning and quality management concepts to optimize in-house workflow and the quality of our deliverables.

Internal Quality Review of Design

We encourage our engineers to challenge each other in the way we do our work to try to identify all of the issues and to generate ideas.

Communication is Top Priority

Our project managers strive to work as an extension of your staff by keeping you informed of our progress and seeking your input for decisions.

No Problem Service Attitude

We foster a “No Problem” service attitude to each other in our daily interactions, which is reflected in our energetic work ethic and how we deliver service to you.

BHC RHODES' Unique Services

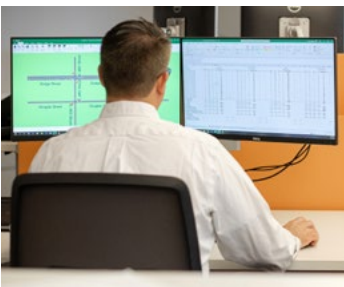

Utility Coordination

In-House Utility Coordination

Eliminates Delays and Controls Costs

- Dedicated in-house expert with more than fifty years of experience
- Focused coordination with constant attention to expedite progress
- Daily lists and electronic logs to keep processes moving
- Continuous contact with utility companies

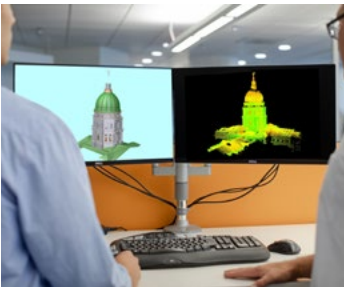

Traffic Engineering

Traffic Expertise

PTOE Certified Staff

- Range of services includes: traffic impact studies, corridor studies, traffic signal design, roundabout design, street lighting, paving marking and signage plans, intersection improvements and traffic calming

Laser Scanning

3D Laser Scanning

Saves Time With Laser Accuracy

- Technology that can measure the immeasurable, under ground and to unreachable heights
- Versatile with precision accuracy
- Increases safety of field crews compared to conventional surveying due to the capability of surveying at a distance of 200 - 600 ft from locations such as traffic, falling debris and other on-site hazards

Telecom

In-House Telecommunications

27 Years Experience

- Experience spans international
- Customers include: Google fiber, AT&T, Level 3, Time Warner, Cox, Bechtel and Ervin
