

Creating **HEALTHY**
ENVIRONMENTS
where people
LIVE, WORK & PLAY

✓ Our **HISTORY**

G&W Engineering Corporation was founded in 1992, as a full-service Mechanical, Electrical, Plumbing, and Fire Protection design firm. As G&W has evolved over the past 27 years, we have expanded our services to include Facilities Condition Assessments, Enclosure Consulting, Commissioning & Retro-Cx, Transportation, Municipal, and Civil Engineering. G&W has developed an extensive project portfolio that has allowed us to work in 47 states on a variety of project types. G&W has grown tremendously over the years; however, the one thing that has not changed is the constant drive to provide quality documents and satisfied clients.

✓ Our **LOCATION**

G&W Engineering Headquarters
138 Weldon Parkway
Maryland Heights, MO 63043

- MSD Phase II Water Regulations & BMP Design

CIVIL SITE Development

- Owner's Representative
- Residential / Commercial Development
- Industrial / Educational Development
- Parks & Recreational Development
- Military Bases

MEP/FP Services / **BUILDING** Services

Mechanical, Electrical, Plumbing, and Fire Protection Engineering is what G&W was founded on in 1992. This specialized engineering involves planning and design for various facility types. G&W engineers prepare and review drawings, specifications, and cost estimates for the MEP/FP systems. WE emphasize systems designs that address efficiently delivering comfort, indoor air quality, life safety, building control, reliability, redundancy and flexibility.

Building Services seemed a natural fit for the continued growth our G&W. With the addition of our building services group over six year ago, G&W is ability to provide property owners and building managers, a complete package from pre to post construction.

MEP/FP Services

- Owner's Representative
- MEP / FP Engineering
