

TRANSPORTATION ENGINEERING

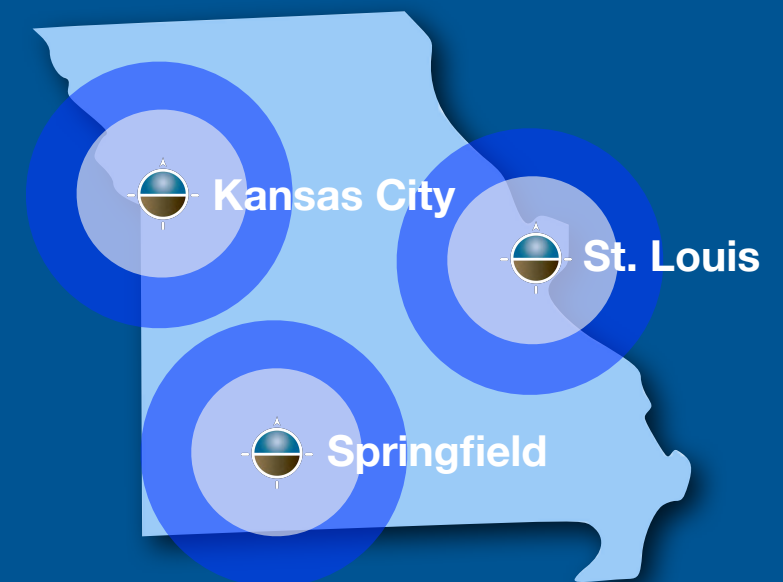

Great River Engineering (GRE) has been providing Transportation Engineering for over 20 years. We have offices in Springfield, Kansas City, and St. Louis, Missouri. GRE understands the importance and value that a safe and reliable transportation system has on a community, county, and state. Our project experience includes on-system roundabouts and off-system roads and street projects.

ENGINEERING

SERVING MISSOURI

- BRIDGE DESIGN
- ROADWAY DESIGN
- TRAILS & SIDEWALKS
- TRAFFIC ENGINEERING & TEAP
- CONSTRUCTION INSPECTION

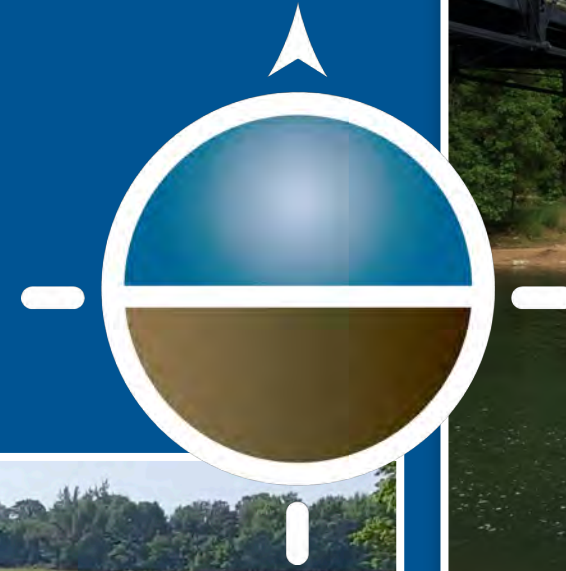

BRIDGE

- Off-System Replacements (BRO)
- Soft Match Credit
- Aquatic Organism Passage (AOP)
- Historic Rehabilitation
- Pedestrian Structures

BRIDGE DESIGN

Great River Engineering is a market leader in bridge design services. Our team has extensive experience in bridge design in conformance with the MoDOT Engineering Policy Guide. These projects have included all types of structures from simple culverts to complex truss rehabilitations to long multi-span bridges. We design our bridges with the focus on meeting the client's objectives.

GREAT RIVER ENGINEERING

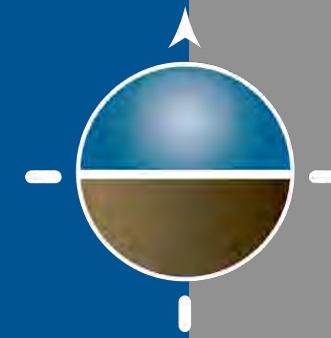

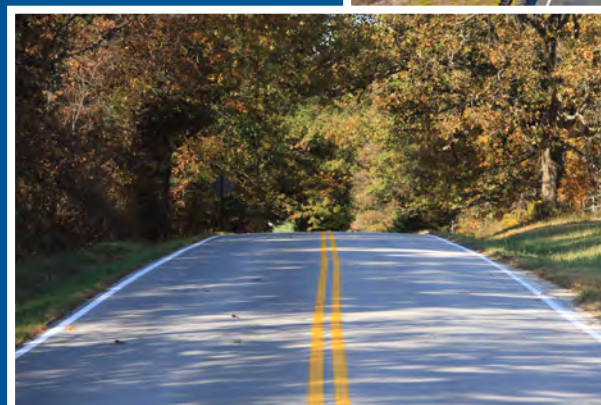

"Our experience with Great River Engineering for all of our different bridge projects has been exceptional."

- Cherry Warren, Presiding Commissioner Barry County

ROADWAY DESIGN

Great River Engineering has the experience needed to complete your road project, no matter the size. Our prior projects include: road condition assessment and repairs, road widening projects, road diets, traffic counts, intersection improvements and new road design. With traffic we have completed signalized intersections, lane additions, and new road master planning.

GRE
GREAT RIVER
ENGINEERING
