February 8, 2016

Dear Consultant:

The Missouri Highways and Transportation Commission is requesting the services of a consulting engineering firm to perform the described professional services for the project included on the attached list.

If your firm would like to be considered for these consulting services, you may express your interest by responding to the appropriate office, which is indicated on the attachments. Limit your letter of interest to no more than three pages. This letter should include a statement to indicate your firm's understanding of the project. It should also include any other information which might help us in the selection process, including key personnel you would assign to the project and the backgrounds of those individuals, and any sub-consultants you would propose to use, and an indication of your firm's approach to promoting and developing a diverse workforce. MoDOT is committed to reflecting the diversity of the communities we serve and we expect our partners to do the same. We will utilize the consultant information already on file so we will not need a lengthy submittal of other general company information. In addition, please attach one page with detailed information on similar projects that your key personnel have worked on. Indicate the role your key personnel played in the projects and include reference contact information.

DBE firms must be certified by the Missouri Department of Transportation in order to be counted as participation towards an established DBE Goal of 10%. We encourage DBE firms to submit letters of interest as prime consultants for any projects they feel can be managed by their firm. We also encourage both DBE firms and non-DBE firms to consider joining MoDOT's Mentor/Protégé program whenever possible as part of a MoDOT project.

MoDOT will evaluate firms based on:

- Past Performance – signal optimization projects of similar size and scope
- Qualifications of Personnel Assigned – qualities/experience of individual employees to be designated to the various tasks for this specific job
- Familiarity/Capability – basic technical/engineering knowledge of the corridor(s), suggesting rudimentary traffic control strategies for improvements and offering mitigation strategies for saturated conditions when applicable
- General Experience of Firm – similar types of signalized corridors of size and volumes and/or related type work of the many tasks of signal optimizations
- Accessibility of Firm and Staff – knowledge/aquaintance of the area and/or previous responsiveness of MoDOT's local needs

Firms will be evaluated based on satisfaction of scope requirements and deliverables. Remote communication to MoDOT's signal database system is required.

*Our mission is to provide a world-class transportation experience that delights our customers and promotes a prosperous Missouri.*  
[www.modot.org](http://www.modot.org)

Firms not providing a response on approach to workforce diversity will be considered non-responsive to this solicitation. Firms that are not current on all of the required prequalification categories found in [MoDOT's Approved Consultant Prequalification List](#) at the date of the solicitation expiration will be considered non-responsive

We request all letters be received by 6:00 pm, February 22, 2016 at the appropriate office.

Sincerely,

A handwritten signature in blue ink, appearing to read "Eric Schroeter". The signature is fluid and cursive, with the first name "Eric" and last name "Schroeter" clearly distinguishable.

Eric Schroeter, P.E.  
State Design Engineer
