

NOTE - THE NUMBERED "1" THROUGH "19" SECTION LOCATIONS SHOWN ARE THE ADDITIONAL CROSS SECTION LOCATIONS THAT WERE SURVEYED BY MoDOT. THE "RS0" THROUGH "RS18" SECTIONS ARE THE SECTION LOCATIONS IDENTIFIED FOR USE IN THE PROPOSED HEC-RAS HYDRAULIC ANALYSIS, AND ARE THE LOCATIONS THAT THE MoDOT SURVEYORS ATTEMPTED TO MATCH WHEN OBTAINING THEIR NUMBERED SECTIONS "1" THROUGH "19".

SECTIONS "EE", "FF" AND "GG" CORRESPOND TO THE SAME SECTIONS IN THE FEMA FLOOD INSURANCE STUDY. THE EXTRA "RS" SECTIONS WERE OBTAINED BY MoDOT TO PROVIDE ACCURATE DETAIL REGARDING THE CHANNEL SHAPE AND TO SUPPLEMENT THE EXISTING CONDITIONS DATA IN THE PROJECT VICINITY FOR USE IN THE NEW HEC-RAS HYDRAULIC ANALYSIS.
