August 11, 2005

Dear Consultant:

The Missouri Highways and Transportation Commission requests the services of consulting engineering firms to perform professional services in the work category of Subsurface Utility Engineering. Firms that are selected will execute a Master Agreement to extend approximately three years. Memorandums of Understanding will be negotiated for individual projects.

If your firm would like to be considered for these consulting services, you may express your interest by responding to the appropriate office, which is indicated on the following page. Limit your letter of interest to no more than two pages. Letters of interest should include a statement to indicate why your firm is qualified to provide the services in this particular work category. It should also include any other information which might help us in the selection process, such as the persons or team you will assign, the backgrounds of those persons, their office locations and projects your company has recently completed or are now active. We will utilize the consultant information already on file so a lengthy submittal of other general company information is not necessary.

All letters must be received by 4:00 pm, August 31, 2006 at the appropriate office. Qualified DBE firms are encouraged to submit letters of interest.

Sincerely,

Dave Nichols
Director of Program Delivery
