

Osage County  
Route N  
Bridge Replacement over Contrary Creek

## Frequently Asked Questions

### **What is the purpose of this project?**

The purpose of the project is to replace the bridge over Contrary Creek on Missouri Route N between US Route 50 and Route J, approximately 1.2 miles north of US Route 50.

### **Why is this work necessary?**

The existing bridge over Contrary Creek was built in 1958 and is sixty-two years old. The condition of the bridge has reached a point where a bridge replacement is necessary.

### **How will traffic be affected?**

During construction Route N will be closed at the bridge location for up to two and a half months. Signs will alert motorists of the closed road. Drivers are asked to seek alternate routes around the construction.

### **When will the work take place?**

The project is scheduled to be awarded in late 2020, with construction taking place mostly during 2021.

### **Will additional right of way be needed to construct this project?**

Temporary Construction Easements will be required for the construction of the bridge.

### **What will the project cost?**

The total construction cost is approximately \$650,000.
