

ADDENDUM #1

HOLT COUNTY, MISSOURI FEDERAL-AID PROJECT NO. BRO-B044(35) BRIDGE NO. 36300192

This Addendum #1 is included and becomes part of the project specifications and contract documents.

1. Possible Borrow Site Option

We have been in contact with the local Levee Managers for each side of the Creek. Per discussions with the County and the noted Managers, it may be a possibility for the Contractor to acquire some and/or all fill dirt from within the levee system in this area of the County. The Levees on both sides of the creek are controlled by District No. 9 on the west side, and The Cannon Levee District on the east side. Managers shall be contacted to discuss acquisition and construction requirements per each Levee District. Contact information is shown below. Property owners of the borrow site may also need to be contacted for permission or easements.

All environmental permits, access easements (if required) and any other required items to purchase, acquire, excavate, haul, seed, etc. any earthen material from within levee system would need to be obtained by the Contractor. Please note that permits (environmental, etc.) will need to be acquired by Contractor for all areas outside the project limits.

Levee Manger Contact Information:

| | | | | |
|-------------------|---|-----------------------|----------------------|--------------|
| Mr. Aaron Luce | - | Levee District No. 9 | (West Side of Creek) | 816-262-3998 |
