## DB-903a Instruction Form

<https://youtu.be/85xpJWqFsw>

### Description and Benefit

The DB-903a Instruction Form is a self-scoring document that is submitted by proposers during design build projects. This innovation saves time and money by streamlining the process by which Proposers develop their Bridge Package in Bridge Bundling Design Build Projects. It simplifies work by reducing questions and concerns over how to fill out the form and how the form translates to the Proposers score in their Proposal.
