## Camera Assisted Remote Sprayer

[https://youtu.be/4jTyWW\\_CVks](https://youtu.be/4jTyWW_CVks)

### Description and Benefit

This innovation is a remote-controlled adjustable sprayer with cameras to be used in pickups. Saves time and money by reducing number of workers needed to perform operation. Simplifies work by utilizing remote control functions instead of using a hand sprayer. Safety is improved by eliminating the risk of possible chemical exposure/ingestion during operation as well as allowing spraying operation to be performed by one individual which in turn promotes social distancing.
