

LOCHMUELLER SERVICES **CONSTRUCTION INSPECTION**

FLEXIBILITY LEADS TO VALUE

Once design is complete, it's important the results you expect follow through to construction. We know how to make that happen by providing guidance and support throughout the process, including representing your interests in the field. Lochmueller helps you understand what's constructable, how contractors view designs, and ensure that what works on paper will work in the field.

PROJECT **HIGHLIGHT**

NORTH LAFAYETTE STREET RECONSTRUCTION

Lochmueller completed design and provided construction inspection for this improved roadway leading into historic downtown with resurfacing, new curb-and-gutter, new storm sewer system and stormwater BMPs, ADA-compliant curb ramps and sidewalks, and utility relocations.

SEE OUR PROJECTS

Because projects occasionally offer surprises, we are experienced working with designers and contractors to adapt and resolve issues quickly. Lochmueller offers constructability reviews, construction phasing, bid review and tabulation, pre-construction meetings, review and approval of subcontractors and vendors, coordination of materials testing, review of contractor's estimates, and preparation of field changes.

CLEVELAND ROAD RECONSTRUCTION ST. JOSEPH COUNTY, INDIANA

Removed one mile of concrete pavement and replaced it with new storm sewers, subgrade treatment, and QC/QA PCCP pavement along with new lighting, signage, center median wall, curbs, drives, guardrail, and a 10-foot-wide multiuse path.

MAIN STREET TRAIL MT. VERNON, INDIANA

Fully reconstructed five blocks along Main Street in downtown with new sidewalks, a multiuse trail with decorative concrete, curb-and-gutters, waterline installation, and full-depth HMA pavement. Landscaping elements such as shrubs, trees, irrigation, and park benches added an aesthetic dimension.

46TH STREET & MICHIGAN ROAD SEPTIC TANK ELIMINATION INDIANAPOLIS, INDIANA

Installed over 4,500 linear feet of sewer installed using trenchless technology to phase out septic system use for 350 homes. Weekly reports and routine emails facilitated extensive coordination with local utilities, contractors, and homeowners.
