

WE ENGINEER SOLUTIONS TO IMPROVE COMMUNITIES.

It's our passion and our purpose.

Services

We offer comprehensive design solutions for infrastructure projects, and we specialize in those involving multiple services and disciplines. What we do improves communities, which is why we pay meticulous attention to every detail of your project. From start to finish.

We're Olsson, a nationally recognized, employee-owned engineering and design firm with a rich history of success. Founded in 1956 on the very mindset that drives us today, we're here to improve communities by making them more sustainable, better connected, and more efficient. Simply put, we work to leave the world better than we found it. *That why in 2021, 93% of Olsson's work came from repeat clients – a testament to who we are and what we do.*

Olsson offers its clients a full spectrum of services, including a complete line of planning, design, permitting, and construction phase services. Maintaining quality is our number one concern, and we can respond to a broad set of client demands in a timely and cost-effective manner.

SERVICES

We offer comprehensive design solutions for infrastructure projects, and we specialize in those involving multiple services and disciplines. What we do improves communities, which is why we pay meticulous attention to every detail of your project — from start to finish.

Team based and purpose driven, we have more than 1,700 team members in 30 offices across nine states and offer a comprehensive list of services: planning and design, engineering, field services, environmental, and technology.

COMMITMENT TO QUALITY

All deliverables prepared for your projects will be reviewed by a qualified Olsson staff member who was not involved in the production. This process will be of sufficient detail to ensure that communication, collaboration, timeliness, constructability, design practice, value, documentation, and conformance with expectations are met.

WE'RE IN THE BUSINESS OF PEOPLE. AS WE CONSULT WITH OUR CLIENTS AND AS WE ENGINEER AND DESIGN PROJECTS OR SUPPORT OLSSON'S OPERATIONS, PEOPLE ARE A CRITICAL PIECE OF EVERYTHING WE DO. WE WANT TO ENSURE OUR CULTURE SUPPORTS ALL PEOPLE AND EMPOWERS THEM TO USE THEIR VOICES AND SHARE THEIR THOUGHTS.

At Olsson, we promote diversity and inclusion to provide our employees and clients with a successful and thriving environment. We want to ensure our culture supports all people and that all employees can use their voices to share their thoughts. Encouraging full inclusion of ideas and skill sets from employees with different backgrounds allows us to bring better solutions to our clients and our firm.

Our Diversity, Equity, and Inclusion (DEI) Council was formed to foster an environment that promotes, supports, and nurtures DEI through daily practice, training programs, and hiring practices. We are taking action to increase diversity by seeking outside support to create our diversity strategy; include DEI into our language; review pay equity to better promote DEI across our footprint; partner with educational resources to add diversity to the industry; and connect employees through employee resource groups to provide opportunities for employees to share support throughout Olsson.

FULL STEAM AHEAD

At Olsson, community involvement is a priority. We feel it's our duty to be an active member of the communities where we work, live, and serve. In 2015, we created the Olsson Foundation, which supports organizations and groups aimed at improving the lives of the people we serve. The Olsson Foundation selects nonprofit organizations that help youth experience the outdoors; science, technology, engineering, the arts, and math (STEAM) programming; educational opportunities, and more.

At Olsson, we position our employees so they can best serve our clients and their needs. Simply put, we are committed to our clients. This commitment includes a safe work environment for all. Safety is something we deeply believe in and not just something we do. Our focus on educating our employees on safe work practices and providing them with the proper tools and resources will make us successful on your projects.

Responsibility for safety and health extends to all of us and resides at every level at Olsson. It is everyone's duty to perform their job in a safe manner. Our safety and health manual outlines the policies, procedures, and guidelines developed in alignment with local, state, and federal regulations. We are knowledgeable and proactive about the hazards that could be encountered or associated with our work. Olsson team members are accountable and empowered to make the right choice and create a safe workplace.

Implementing Safety in Missouri

The City of Kansas City's *Vision Zero KC* program was created to focus on creating safer streets and eliminating traffic injuries and fatalities in Kansas City neighborhoods.

Olsson worked with the city to identify how to improve bike connections between the University of Missouri-Kansas City and downtown. The project focused on Gillham Road, a four-lane and six-lane boulevard with intermittent on-street parking that experiences 12,000 to 16,000 vehicles per day. Gillham Road connects several large parks and historical, active neighborhoods.

Working closely with the city, as well as neighborhood associations, bicycling groups, institutions, and developers, we developed bicycling facilities that preserved on-street parking while increasing the protection and comfort level of bicyclists moving along the corridor.
