# U.S. ROUTE 50 INTERSECTION IMPROVEMENTS

Osage County  
Linn, MO

## PROJECT HIGHLIGHTS

- **Start date:** Summer 2024
- **Location:** U.S. Route 50 intersections in Osage County.
- **Traffic impact:** Daytime single lane closures.
- **Budget:** \$2,100,000
- **Average daily traffic:** More than 8,000 vehicles daily.

Subject to change. Information current as of June 2023.

# PROJECT DETAILS

## Why is MoDOT planning changes?

With more than 8,000 vehicles using this section of U.S. Route 50 each day, traffic can get very congested, especially during work and school rush hours. By adding turn lanes and signals and by reconfiguring intersections, MoDOT plans to alleviate the congestion and provide safer turning opportunities at the U.S. Route 50 intersections included in this project:

- Missouri Route CC (including State Tech Access Drive and Lakeside Book Company's entrance)
- Technology Drive

## How will traffic be impacted?

Traffic will remain open during construction. Single-lane closures may take place under traffic control during working hours.

## What is the cost of the project?

The anticipated total cost for this project is \$2.1 million.

## When is MoDOT planning to make the improvements?

At this time, the project is expected to be part of MoDOT's May 2024 letting when contractors may submit competitive bids.

Construction is anticipated to begin in summer 2024 and should be complete that same year.

As with all projects that are in the planning stage, these dates are subject to change.
