ADDENDUM NO. 2 - QUESTIONS AND ANSWER

Questions: Has a draft contract been prepared for this project? If so, can it be provided to potential proposers?

Answer: St. Louis County is currently finalizing the draft contract language. It is anticipated that much of the base contract will be unchanged from previous professional services contracts. The majority of revisions to the contract will be in the list of scope items for the consultant and the list of scope items for the County. Those scope items should generally follow what has already been published in the RFQ and in Addendum No. 1. The final scope will be documented during the scoping meeting with the selected consultant.
