

# Improve I-70 Kansas City

## Industry Meeting, February 13, 2024, Questions and Answers

**Question 1:** Will bicycle and pedestrian access upgrades be addressed with project?

**Response 1:** Improving accessibility for the local community is part of our project goals. Improving and accommodating pedestrian, bicycle, and transit facilities along city streets within the project is a project requirement.

**Question 2:** Is the \$13M in additional project funds for a specific purpose from a specific source?

**Response 2:** The additional funds are being provided by the City of Kansas City for urban design (aesthetic) elements, as well as water and sewer utility work on the project.

**Question 3:** Will the safety tool be rolled out to other Design-Build projects?

**Response 3:** The safety quantitative analysis tool will be available for potential use on all projects, including other Design-Bid-Build and Design-Build projects. Use will be determined on a per project basis.

**Question 4:** Will the safety tool be made available to everyone?

**Response 4:** The safety quantitative analysis tool and supplemental files will be shared as part of project early release information.
