

TR202409 Letting Optimization RFP - Questions and Answers

Q1: In Section 2: Scope of Work, the not-to-exceed price for 18 months of work is \$250,000. Can you please confirm that NTE is meant to encompass all 7 tasks for the 18 month duration?

A1: The price is Research's best estimate of the cost (and time) to complete the work. MoDOT encourages all proposals, regardless of cost, to be submitted. Scoring and selection of the top proposal is strictly based on the quality of the proposal and qualifications of the Offeror. However, award of the contract to the top proposer will be dependent upon the budget available for the project.

Q2: Will a tool written in the Java programming language be accepted? If not, can a Java-based tool hosted on a consultant server be used to demonstrate the methodology prior to C# translation?

A2: Please refer to Section 5: Agreement Requirements (Y) in the RFP.
