

MOTOR BUS APPORTIONMENT

Determination of Distance

The Apportionable Fees of a Fleet that is involved in a Pool may be calculated using:

- Apportionment Percentages or,
- the Apportionment Percentage may be calculated by dividing (a) the scheduled route distance operated in the Member Jurisdiction by the Vehicles in the Pool by (b) the sum of the scheduled route distances operated in all the Member Jurisdictions by the Vehicles in the Pool. Scheduled route distances shall be determined from the farthest point of origination to the farthest point of destination covered by the Pool.

If a Registrant has used the pool calculation method to register its Fleet initially for a Registration Year, it shall also use this same method to register any Apportionable Vehicles it may add to its Fleet during the year.
