➤ WHO WE ARE

## Ingenuity That Shapes Lives™

Buildings  
Construction

Essential infrastructure touches all of our lives – so how can we shape it for the better? At GFT, a privately held AEC firm, we innovate where transportation, water, power, and buildings converge. **We call this the Infrastructure of Life.**

---

We measure our success by the strength of our relationships – that’s why we’re the employer of choice for 5,500+ of the industry’s brightest engineers, planners, architects, inspectors, designers, and construction managers, and more.

Our clients choose us for our expertise and prefer us for our nimble approach, creativity, and personal touch. Backed by over a century’s experience, together, we’re building a world where infrastructure creates well-being and opportunities for everyone.

# Transportation

GFT has partnered with clients to improve how people and goods move across today's connected transportation networks. We provide consulting, engineering, and architecture solutions that balance innovation with practicality, focused on delivering systems that work for the people who rely on them every day. Our 5,500 professionals in more than 130 offices across the U.S. offer a full range of advisory, planning, design, and construction management services. We take a collaborative, hands-on approach that helps clients address complex transportation challenges with clarity and confidence. As a single source for integrated transportation solutions, GFT supports every stage of project delivery. From early planning through construction, our award-winning planners, architects, engineers, and construction managers guide each effort with technical excellence and a personal commitment to quality.

## Transportation Capabilities

GFT's transportation professionals bring deep experience supporting agencies, cities, and states as they enhance mobility, safety, and resilience. We help clients tackle complex transit and infrastructure challenges through data-driven, people-focused solutions. Our expertise spans nearly every mode and phase of transportation, from planning and grant management to design, construction, and program delivery. Whether developing new transit facilities, performing systems analysis, or conducting compliance and triennial reviews, we work closely with clients to define challenges, deliver results, and bring their vision to life.

We know what it takes to plan, design, build, safely operate, and maintain roadways. We've completed thousands of miles of multilane and split-level roadway designs. Our final designs include interchanges ranging from the simple diamond type in rural areas to complex, diverging diamond, and single-point urban interchanges. While we're best known for major highway design, we also design two-lane arterials, realignments, and bridge approaches – all the parts necessary to complete the transportation ecosystem. And, we have expertise in localized streetscape, traffic calming, context-sensitive solution design, and Institute for Sustainable Infrastructure (ISI) recognized initiatives. Urban or rural, simple or complex – whatever the location or project needs, we work alongside you to achieve the optimal, localized approach to your project.

### Roadway Solutions Include:

- Advanced mobility
- Alternative delivery
- Asset management
- Construction management
- Design
- Geographical information systems (GIS)
- Infrastructure resiliency
- Inspections
- Managed or express lanes
- NEPA documentation
- Noise analysis, modeling, & design
- Planning
- Program management
- Stormwater & drainage management
- Toll infrastructure & facilities
- Toll system integration & interoperability
- Transportation operations
- Utility coordination

## OUR SERVICES

▶ **TRANSIT & RAIL PLANNING**

▶ **TRAFFIC ENGINEERING & OPERATIONS**

▶ **BRIDGE DESIGN & INSPECTION**

▶ **ROADWAY & CORRIDOR IMPROVEMENTS**

▶ **MULTIMODAL PLANNING & DESIGN**

▶ **ENVIRONMENTAL & RESILIENCY SERVICES**

▶ **GRANT & COMPLIANCE SUPPORT**

# Construction Services

GFT has partnered with clients to improve how people and goods move across today's connected transportation networks.
