

### Brainstorming Phase

- Explore varied design options.
- Identify important local criteria.

### Analysis Phase

- Compare alternatives based on local criteria.

### Decision Phase

- Develop traffic operation and safety design models, as well as detailed cost estimates, for remaining alternatives.

### HOW SHOULD TRAFFIC GET AROUND THE 1.5 MILE EASTBOUND I-64 CLOSURE?

	Head-to-Head Traffic on WB Bridge	Route EB Traffic on City Streets
Hospital Access Preserved	✗	✓
Pedestrian Safety Preserved	✓	✓
Fewer Ramps Closed	✗	✓
Interstate Safety Preserved	✗	✓
Room for Crash Response Vehicles	✗	✓
Simplify Signal Management with One-Way Priority	✗	✓

### RECOMMENDED ALTERNATIVE

**Detour all 3-lanes of EB traffic onto Vandeventer & Forest Park Ave.**

- Use 2-Lane detour route.
- Manage local signals to move traffic smoothly.
- Provide incentives to minimize the duration of this phase.

WB Bridge with Head-to-Head Traffic
