About this Report

As the Missouri Department of Transportation, we hold ourselves accountable to the traveling public and the citizens of the state – our customers. Missourians have repeatedly communicated the number one goal for MoDOT is to take care of the existing system of roads and bridges. Missouri has one of the largest transportation systems in the nation; seventh in terms of size, with nearly 34,000 miles of roads and over 10,000 bridges and culverts. Together with our transportation planning partners and construction partners, MoDOT identified and completed 4,158 projects over the last decade, worth over \$9.9 billion.

Across every region of the state, these projects provided improvements that maintain the existing system, improve safety and reliability and spur economic growth. The costs include engineering, right of way and construction, shown in thousands of dollars. The completed projects deliver on the commitment to provide a world-class transportation system that is safe, innovative, reliable, and dedicated to serving customers for a prosperous Missouri.
