MESSAGE FROM THE DIRECTOR

Message from Missouri Department of Transportation Director Ed Hassinger

As the Missouri Department of Transportation, we hold ourselves accountable to the traveling public and the citizens of the state – our customers. And customers expect results. That’s why one of our core tangible results as a department is to “deliver the program.” The program consists not only of the things we all see while driving Missouri’s roadways – work zones, paving operations, etc. - but also the things that aren’t readily apparent. You may not be able to easily see that bridge that needs a bit of structural repair underneath or may not consider how traffic flow could be improved by a different roadway design. That’s what we do, and that’s why we’re here.

Every year, MoDOT works closely with planning partners in communities across the state to put together the Statewide Transportation Improvement Program (STIP), which details planned construction projects over the next five years. It’s big part of what we consider “the program,” and with continued investments from the General Assembly and Gov. Kehoe, the FY 2027-2031 STIP makes available \$13 billion of federal and state revenues over those next five years. This is great news considering Missouri’s transportation network continues to be the seventh largest in the nation, with nearly 34,000 miles of roads and over 10,000 bridges and culverts.

This year’s STIP details \$9.3 billion in contractor awards for road and bridge construction. That’s an average of \$1.8 billion per year and includes design and project development costs - funding over 1,200 projects. The STIP also details the remaining plans for the Improve I-70 program and the Forward 44 effort, which will bring improvements to the corridor.

This document – Missouri’s Road and Bridge Program – serves as a condensed version of the STIP. It outlines what construction will take place and where, quickly and easily for our customers. Showing how and where Missouri’s road and bridge revenues are invested not only holds us accountable, it also helps us get it right as we move forward. With the help of our construction partners we have completed 4,211 projects over the last decade, worth over \$8.3 billion. Hard work and thorough planning allowed those projects to be delivered \$299 million below budget and 93% on time – quite the accomplishment.

“Hard work and thorough planning allowed those projects to be delivered \$299 million below budget and 93% on time – quite the accomplishment.”

MESSAGE FROM THE DIRECTOR

Relationships are key when it comes to identifying infrastructure needs in all areas of the state. MoDOT as an organization will continue to work with our regional transportation planning partners as well as local, state and federal officials to prioritize needs and fund projects that provide the greatest return on investment to taxpayers.

Keeping assets in good condition for as long as possible is an important part of maintaining infrastructure. That's why MoDOT has developed asset management plans for each district, outlined in this document, with the goal of maintaining current pavement and bridge conditions. Research shows preventive maintenance solutions, such as cyclical overlays on roads in good condition, are the most cost-effective approach to taking care of road and bridge assets. Without these preventive maintenance investments, the cost of improving those roads and bridges once they reach poor condition can cost four to ten times more.

Each MoDOT district receives funding to invest in Missouri's transportation system. Since 2003, the Missouri Highways and Transportation Commission has used a formula to distribute construction program funds for road and bridge improvements to each of its districts. The formula provides predictable funding for safety improvements, asset management and system improvements.

Working with industry partners, MoDOT stands ready to deliver on the projects listed in this document and fulfill our mission to provide a world-class transportation system that is safe, innovative, reliable and dedicated to serving customers for a prosperous Missouri. Together, we will continue to do great things for the citizens of our state.

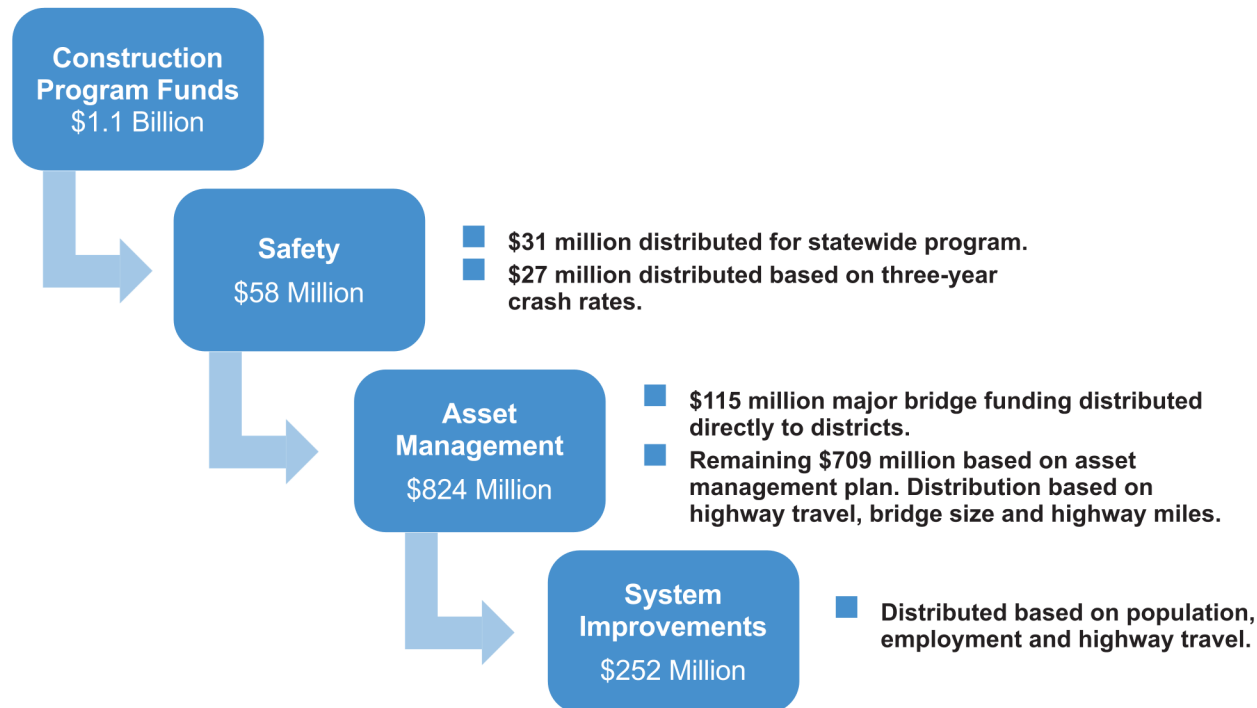

Missouri Roads and Bridge Program

2027-2031

Financial and Regional Planning Process Summary

The majority of funding for state roads and bridges comes from state and federal fuel taxes. Other funding sources include vehicle sales taxes, vehicle and driver licensing fees, interest earned on invested funds and other miscellaneous collections.

These funds are available for MoDOT's operating and construction program budgets. MoDOT's operating budget includes staff and expenses for maintenance, fleet, facilities, information systems and administrative activities. The remaining funds are available for the Program, which is the largest area of MoDOT's budget. STIP funds are allocated annually to districts using the following formula (based on 2027 categories and amounts):

Once construction program funds are distributed to districts, MoDOT collaborates with regional planning groups to identify local priorities based on projected available funding. The regional transportation improvement plans are brought together to form MoDOT's Program. There are two types of regional planning groups in the state: urban areas have Metropolitan Planning Organizations, and rural areas have Regional Planning Commissions. Board members for each of these groups are typically city and county leadership, elected officials and local business owners.

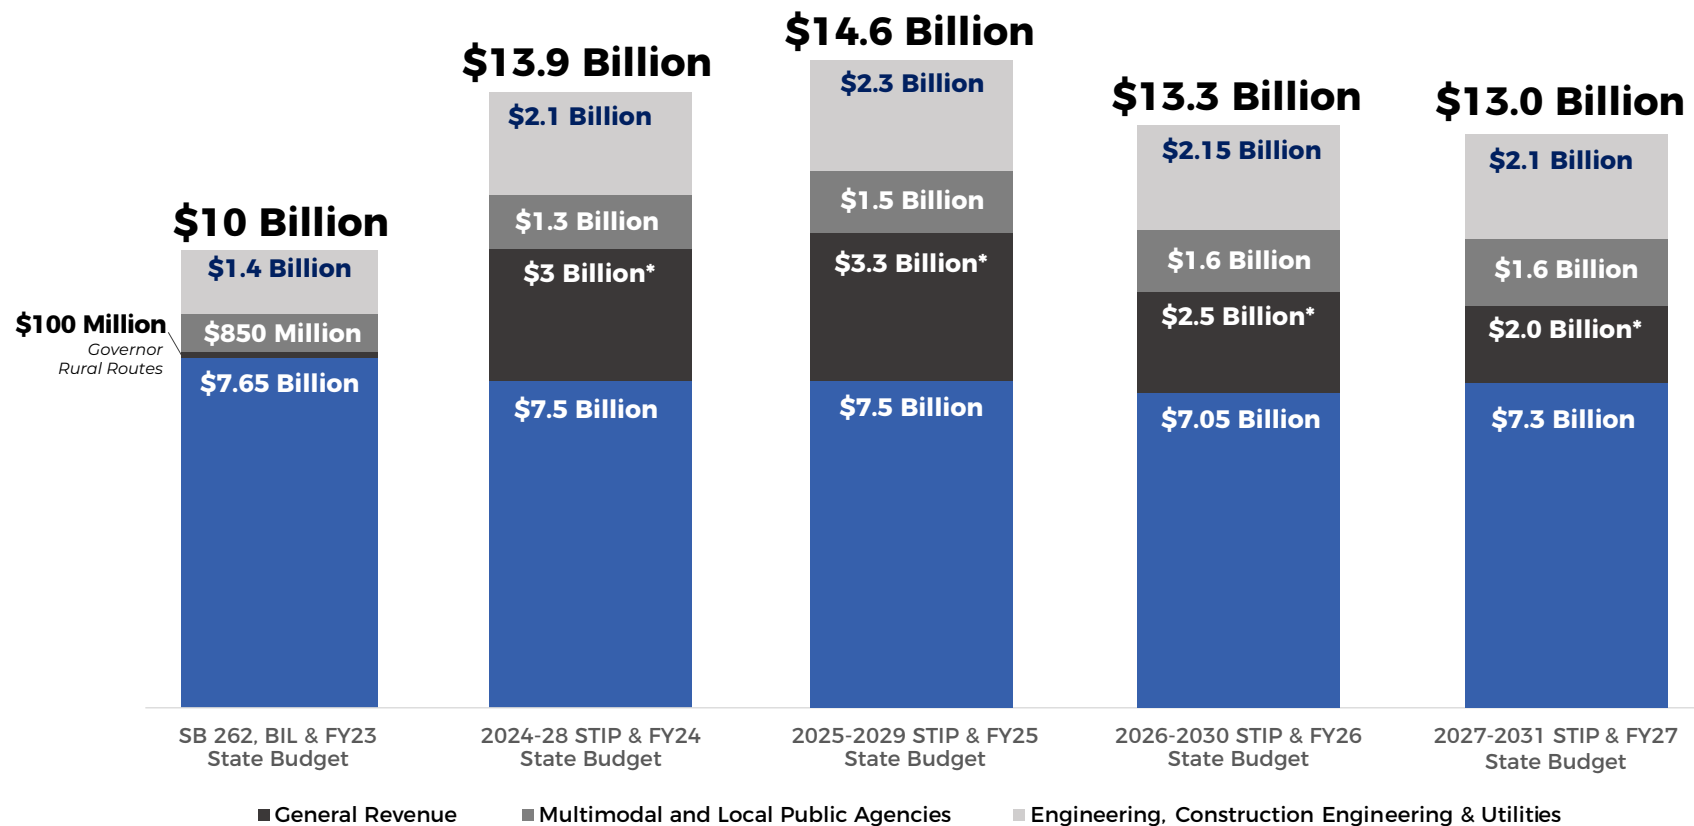

The regional planning groups reach out to local citizens to identify transportation needs. MoDOT staff assists regions to prioritize those needs based on road and bridge conditions, traffic safety data and overall mobility. The prioritization process also includes balancing priorities with available funds.

Reference Information

Asset Management	A strategic practice focused on using limited resources for the preservation, operation and management of the state's transportation infrastructure.
Capital Improvement Project	A transportation improvement that substantially increases the capacity of the transportation system, such as new travel lanes, interchanges or bridges.
Fiscal Year	This is the 12-month period to which the annual Program budget applies. The State of Missouri fiscal year is July 1 through June 30. The Program fiscal year is July 1 through June 30.
General Revenue	State funds lawmakers have the authority to allocate.
Inflation	Three percent project growth factor compounded annually is applied to right-of-way and construction in program years 2, 3, 4, and 5.
Lane Miles	Represents the centerline length multiplied by the number of lanes on pavement improvement projects.
Length	Represents the calculated centerline distance on a project based on the primary direction of each route.
Payback Projects	A transportation improvement project that has been completed. Payments are made for work that has already occurred. Projects are noted with a "PAYBACK" watermark.
Payment Projects	A transportation improvement project administered by a partnering agency. The funding represents MoDOT's state and federal resources allocated to the project. Projects are noted with a "PAYMENT" watermark.
Rural Route Funds	The FY 2027 budget included \$20 million for low-volume minor routes across the state.
Est. Total Cost	Represents the planning estimates of the total costs of the project. These include: preliminary engineering, right-of-way, utilities, construction and construction engineering.

ABOUT THIS PROGRAM

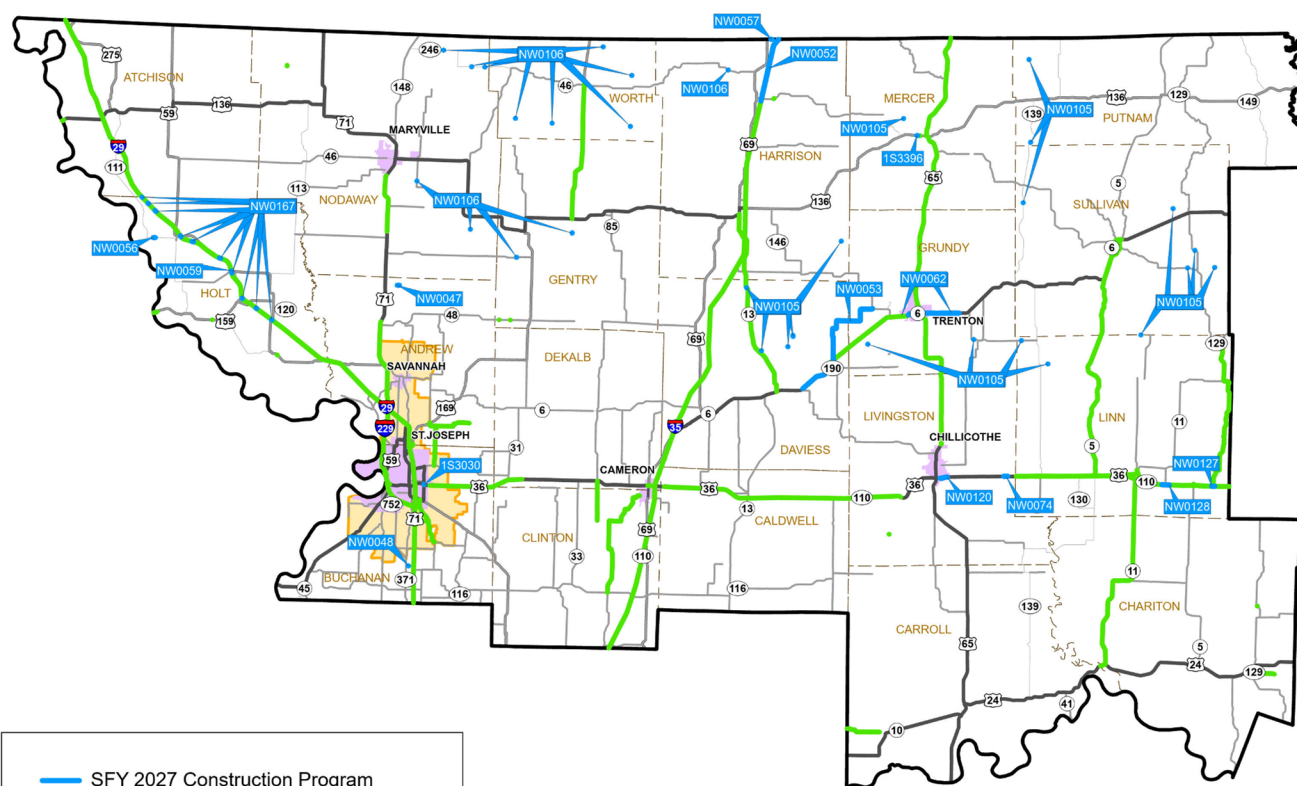

The annual Statewide Transportation Improvement Program (STIP) provides information regarding the different levels of available state and federal road and bridge funds. The FY 2027-2031 program provides \$13.0 billion and more than 1,200 projects, including \$2.0 billion in General Revenue for Legislatively Designated Road and Bridge projects and multimodal projects.

*General Revenue for the Reconstruction and Expansion of Interstate 70, Improvements to I-44, Governor Rural Routes, and more

Operations and Maintenance Summary

Calendar Year 2026 - 2028

The information contained on the following pages shows planned work as well as routine maintenance work for the next three calendar years. The planned maintenance work is programmed at 90% the first year, 70% the second year and 50% the third year. The routine maintenance work is a projection of responsive work for the next three years, based on historic data.

	<u>Northwest</u>	<u>Northeast</u>	<u>Kansas City</u>	<u>Central</u>	<u>St. Louis</u>	<u>Southwest</u>	<u>Southeast</u>	<u>Central Office</u>	<u>Total (1,000)</u>
2028
