WHAT WE'VE HEARD SO FAR

PROJECT GOALS

Project goals were co-created with the public by integrating community feedback and corridor priorities.

SAFETY FOR EVERYONE

Make the street safe for people walking, biking, taking the bus, and driving. Reduce crashes and serious injuries. Design the road so people can move safely at all times of day.

MORE WAYS TO TRAVEL

Give people safe and easy options for how they travel. Make it comfortable to walk, bike, take the bus, or drive, so people can CHOOSE what works best for them.

MAINTAIN GRAVOIS

Fix pavement, signals, and signs to maintain roadway for reliable use.

DESIGNED FOR THE COMMUNITY

Design the street to support the people who live and work nearby. Make it a place that feels welcoming, supports local businesses, and fits the neighborhood.
