Operations and Maintenance Summary	148

MESSAGE FROM THE DIRECTOR

The citizens of Missouri own a tremendous asset – the state transportation system. A significant component of the state system is the 33,859 miles of roads and 10,385 bridges, both of which rank among the largest for any state in the nation. On average, Missouri drivers pay \$30 per month in fuel taxes and fees to fund the maintenance and improvements to this asset. Over the last 10 years, Missourians have invested in 4,405 projects totaling \$12.1 billion to maintain and improve the system. Looking forward, \$4.6 billion is estimated to be available for projects over the next five years for additional improvements.

Since transportation needs greatly outweigh funding available, the challenge is determining the optimal projects to fund that provide the greatest return on investment to taxpayers. Across every region of the state, feedback from Missourians has consistently prioritized maintaining the existing system as the highest priority. Other priorities include projects that improve safety, spur economic growth and provide more transportation choices.

With the priority of maintaining the existing system, MoDOT has developed asset management plans for each district with the goal to maintain current pavement and bridge conditions. The asset management plans focus on preventive maintenance improvements to keep good roads and bridges in good condition. Research shows preventive maintenance solutions, such as cyclical overlays on roads in good condition, are the most cost-effective approach to taking care of road and bridge assets. If preventive maintenance investments were not made, the cost of improving the asset in poor condition can cost four to ten times more.

Missouri's 2020-2024 Road and Bridge Program includes funding for "Focus on Bridges"; a priority initiated by Governor Parson and funded by the Missouri General Assembly approved budget with a one-time \$50 million injection of general revenues for the rehabilitation and/or reconstruction of 45 bridges. The 45 bridges are identified in the Program with a "FOCUS ON BRIDGES" watermark. The money currently dedicated to these bridge projects will then be freed up for additional improvements to the state system of roads and bridges.

This Program was developed assuming federal funding levels consistent with the FAST Act, which expires in September 2020. A forecast assuming a reduced level of federal funding, consistent with Highway Trust Fund revenues, was also prepared. MoDOT and planning partners worked together to identify specific Federal At Risk Projects that would be delayed, should federal funding be reduced. Those projects are shaded in gray in this document.

“MoDOT continues to invest taxpayer money wisely. Over the last 10 years, MoDOT has delivered 4,405 projects worth \$12.1 billion. These projects were completed 7.1 percent under budget and 94 percent on time.”

MESSAGE FROM THE DIRECTOR

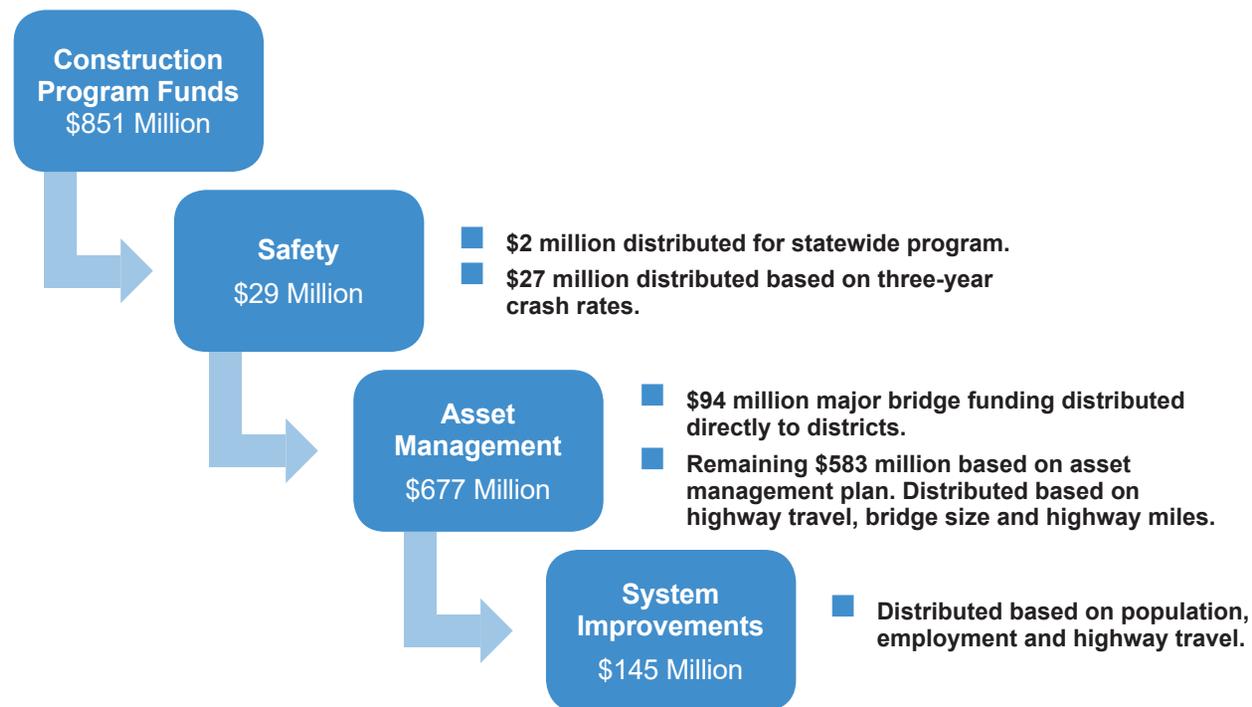

The projects in the Program deliver what taxpayers have asked for – take care of the existing system. While \$4.6 billion of available funding represents a significant investment, many regions will only have adequate funding to maintain current pavement and bridge conditions. While maintaining the status quo is not what Missourians desire, it is not prudent for the state to expand the transportation system in regions that struggle to take care of the existing system.

Each MoDOT district receives funding to invest in Missouri's transportation system. Since 2003, the Missouri Highways and Transportation Commission has used a formula to distribute construction program funds for road and bridge improvements to each of its districts. The formula provides funding for safety improvements, asset management and system improvements.

Financial and Regional Planning Process Summary

The majority of funding for state roads and bridges comes from state and federal fuel taxes. Other funding sources include vehicle sales taxes, vehicle and driver licensing fees, interest earned on invested funds and other miscellaneous collections.

These funds are available for MoDOT's operating and construction program budgets. MoDOT's operating budget includes staff and expenses for maintenance, fleet, facilities, information systems and administrative activities. The remaining funds are available for the Program, which is the largest area of MoDOT's budget. STIP funds are allocated annually to districts using the following formula (based on 2022 categories and amounts):

Once construction program funds are distributed to districts, MoDOT collaborates with regional planning groups to identify local priorities based on projected available funding. The regional transportation improvement plans are brought together to form MoDOT's Program. There are two types of regional planning groups in the state: urban areas have Metropolitan Planning Organizations, and rural areas have Regional Planning Commissions. Board members for each of these groups are typically city and county leadership, elected officials and local business owners.

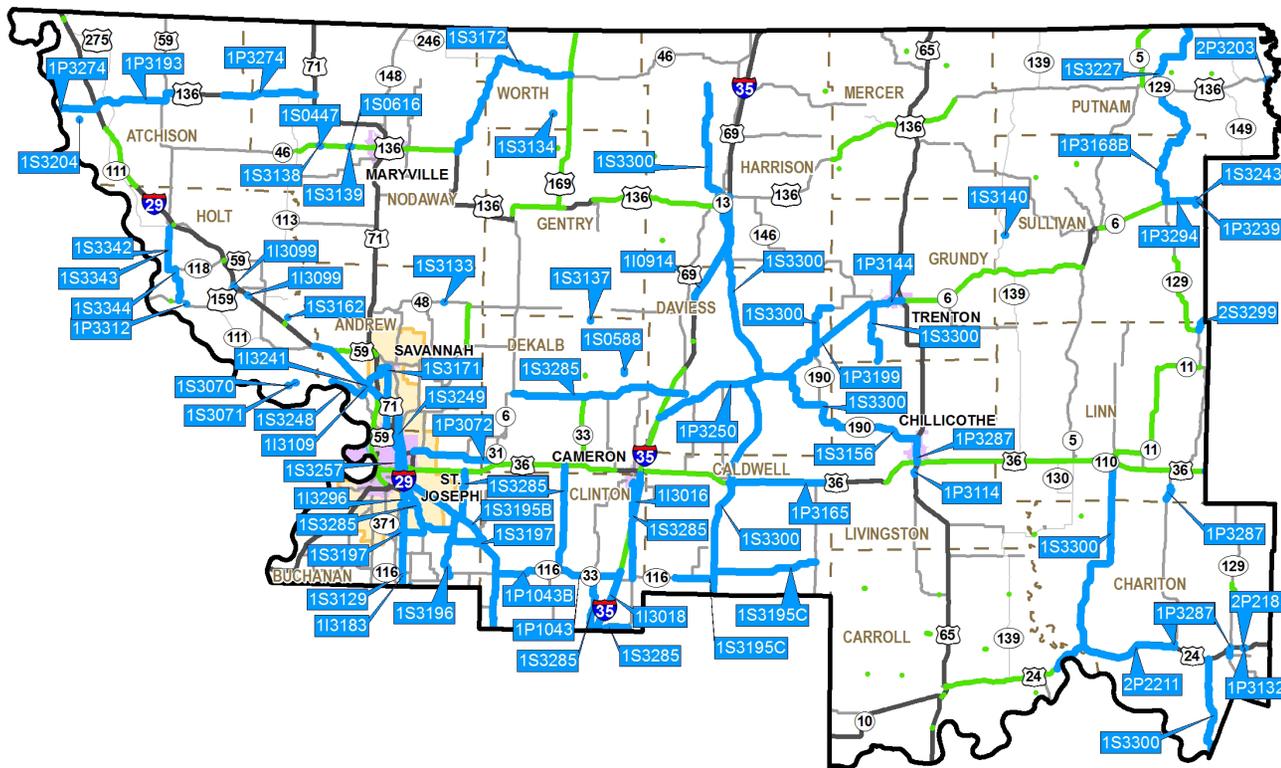

The regional planning groups reach out to local citizens to identify transportation needs. MoDOT staff assists regions to prioritize those needs based on road and bridge conditions, traffic safety data and overall mobility. The prioritization process also includes balancing priorities with available funds.

Reference Information

Asset Management	A strategic practice focused on using limited resources for the preservation, operation and management of the state's transportation infrastructure.
Capital Improvement Project	A transportation improvement that substantially increases the capacity of the transportation system, such as new travel lanes, interchanges or bridges.
FAST Act	The Fixing America's Surface Transportation (FAST) Act is a funding and authorization bill to govern United States federal surface transportation spending for federal fiscal year 2016-2020.
Federal At Risk Project	A project that would be delayed to future years, should federal funding be reduced when the FAST Act expires September 2020.
Fiscal Year	This is the 12-month period to which the annual Program budget applies. The State of Missouri fiscal year is July 1 through June 30. The Program fiscal year is July 1 through June 30.
Focus on Bridges	A program to repair or replace several of the state's worst bridges. Projects are noted with a "FOCUS ON BRIDGES" watermark.
Inflation	Three percent project growth factor compounded annually is applied to right-of-way and construction in programs years 2, 3, 4, and 5.
Lane Miles	Represents the centerline length multiplied by the number of lanes on pavement improvement projects.
Length	Represents the calculated centerline distance on a project based on the primary direction of each route.
Payment Projects	A transportation improvement project administered by a partnering agency. The funding represents MoDOT's state and federal resources allocated to the project.
Est. Total Cost	Represents the planning estimates of the total costs of the project. These include: preliminary engineering, right-of-way, utilities, construction and construction engineering.
