Traveler Information Map
Check MoDOT’s Traveler Info Map for weather-related road closures, flood closures & work zone locations at http://traveler.modot.org/map

The Lehman-Wilson team, which includes Lehman Construction Co. of California, Missouri and Wilson & Co. Engineers & Architects of Kansas City, has been selected for the design-build contract to replace 31 weight-restricted and poor condition bridges in northern Missouri over the next two and a half years through the Fixing Access to Rural Missouri (FARM) Bridge Program. It was made possible by the 2019 receipt of a $20.7 million federal grant under the Federal Highway Administration’s Competitive Highway Bridge Program.

Design-build is a project delivery method in which one contracting team is selected to design and build the highway improvement under one contract. MoDOT provides the project goals, budget and schedule and the contractor team completes the work. This technique has been known to significantly save time and provide cost savings.

The project will replace deficient bridges on low-volume routes that are:
- Weight-restricted
- In poor condition
- On timber pile
- One-lane but carry two-way traffic

For more information and to view a full list of bridges included in this program, please visit: https://www.modot.org/farm-bridge-program
