

GET INVOLVED!

ENGAGEMENT TIMELINE

Public Meeting #1 MARCH 3, 2026

Gather concerns and input about the lived experience of using Route 30 (Gravois) and share data from the “existing conditions analysis,” or how Gravois looks, feels, and functions today.

Public Meeting #2 JUNE 2026

After gathering the concerns from the people who regularly use the corridor, we will share potential options for addressing concerns to see which of those options the community is interested in pursuing for the corridor.

Pop-Ups, Presentations, and More! ONGOING

Public Meeting #3 FALL 2026

The third public meeting will share the recommendations that the department has determined for the corridor, checking with the public to see that those recommendations continue to meet the vision for Gravois and that the impacts of those options are acceptable. This meeting will include safety demonstrations along Gravois.

Public Meeting #4 FALL 2027

The department will share the plans that have been determined, based on the input from the community, for a final check from the people who live, work, play, commute or otherwise travel Gravois. This remains early in the process so that if the plan needs to be adjusted, it can.

Public Meeting #5 SPRING 2029

The final public meeting will be held prior to construction of the project to bring awareness to the upcoming work. Information will be available about the final design to be built and what people can expect during construction.

Do you have a community event or group you would like to connect with this project?
Let us know!

Join us for the
THIRD PUBLIC MEETING
and a
SAFETY DEMONSTRATION
coming this fall!

WHAT ARE WE WORKING ON NEXT?

- ▶ Using your feedback, the planning team will lay out a conceptual plan for Gravois.
- ▶ This plan will include specific locations for safety and traffic calming measures.
- ▶ In the fall of 2026, the planning team will gather feedback on this plan before beginning engineering design.
