---

The [Bridge Standard Drawings](#) have been updated as described below:

**Implementation Statement: Effective immediately for details not started.**

*(The Implementation Statement is a recommendation by the Development Section. The SPM is responsible for the level of implementation for any particular job.)*

Revision Date	Items Revised	Description of Change
March 2021	EPG: NA	Created new standard drawings (BEM) for barrier end modification for 12" wide vertical-face barriers (used primarily on Safe & Sound bridges). The modification allows for proper attachment of MGS guardrail. BEM01 is for structures with no wearing surface added. BEM02 is for structures where a wearing surface has been added. Both include a barbill sheet (BEM01-2 and BEM02-2). Moved Curb Blockout (CBO) standard drawings to a new category called Barrier Modifications – BEM & CBO. (CBO drawings are unchanged.)
	Bridge Standard Drawings: <a href="#">BEM &amp; CBO</a>	
	MicroStation Cells: NA	
	Std. Specifications: NA	
	Standard Plans: NA	
	Bridge Special Provisions: NA
