| Aug. 2023     | EPG: 751.22.3.7.4; 751.21.3.6.1 | Existing guidance was not clear on how to size the concrete diaphragm for prestressed girders over 3’-0” wide beam caps. Existing guidance could be interpreted to exclude #5 or #6 stirrups in a 3’-0” wide beam cap due to the 5 ¼” clearance required to joint filler. This was not the intent, and guidance was added to ignore the clearance if it requires the diaphragm to be less than 2’-6”.
