**Subject:** Bridge Advertisement (DSI 20-050) Beam Cap FRP Wrap Note  
**Date:** Tuesday, November 24, 2020 7:48:04 AM

---

The [EPG](#) and [Bridge Standard Drawings](#) have been updated as described below:

**Implementation Statement:** For all jobs not yet through the Review process.

Revision Date	Items Revised	Description of Change
<a href="#">Nov. 2020</a>	EPG: <a href="#">751.50</a>	Updated EPG 751.50 standard detailing notes (added notes I4.1 & I4.2) and standard drawing RHB08 to clarify note regarding design force.  The previous version of the note included an equation $(1.1DL + 0.75(LL+I))$ that is not used to determine the design force on the FRP wrap. The equation $(1.1DL + 0.75(LL+I))$ is used in a separate check of the shear strength of the beam cap, ignoring any contribution from the FRP wrap. See EPG 751.40.2.3.2 for further guidance.
