Automated Fleet Watcher Mobile Device App

Description and Benefit

This App provides roadway inspectors with real time accounts of asphalt fleet on construction contracts. This application has become more convenient over the past couple years during the COVID-19 pandemic. During a time where social distancing was needed, this app allowed us to continue our day-to-day business without having the face-to-face interaction. From the app we are able to get our tickets and track equipment, construction updates and materials. From the app you still have total control, and if something should happen to go wrong, you can instantly check and see where the problem is. This application has been a true benefit and it can be found on the MoDOT app store.
