General Notes:
Concrete鼬u guardrail details shall be placed on top of the barrier as shown on Exhibit Standard Plan 617.10 and in accordance with Sec 6.7. Barriers on bridges with permanent roadway treatment shall have retroreflective sheeting on both sides. Concrete鼬u barriers will be considered completely covered by the contract unit price for Type B barrier.

Minimum clearance to reinforcing steel shall be 1 1/2" except as shown for bars embedded into end piers.

Use a minimum gap of 2 1/2" between K9 and K10 or K13 bars.

Standard Drawing Guidance:
Do not show on plans:
- Dimensions are based on 2 1/2" thick deck.
- Subgrade 7 1/2\" or 5 3/4\" per 100 foot deck.

Reinforcing Steel:
The K1-K2 bar combination may be furnished in one bar as shown on the contractor's option. All dimensions are cut to fit.
