Standard Drawing Guidance (do not show on plans):

Add Standard Note H9.1a, or H9.1b or H10.7.1 depending upon the use of guardrail or barrier system.

 noted use a minimum lap of 3'-1" between K9 and R6 bars. Where cross bars are not shown on bar drawings, the above laps are assumed. The laps are based on a 6" slab with no additional wearing surface. If your design varies from this, then adjust the BAR file accordingly.

The values used in the BAR file "ss" provided with the template drawings are based on a 6" slab with no additional wearing surface. If your design varies from this, then adjust the BAR file accordingly.
