GENERAL NOTES:

Anchor bolts for Type C bearings shall be 1 1/8" ASTM A307 Grade B swedged bolts, with no heads or nuts. The anchor bolts shall be set 1" less than the extension into the concrete. Anchor bolts shall be set in the drilling holes or in the anchor bolt wells and grouted prior to the erection of the project. The top of anchor bolt shall be set approximately 1/4" below the top of bearing.

Anchor bolts shall be coated with a minimum of two coats of inorganic zinc primer (5 mils minimum). Weight of the anchor bolts for bearings are included in the weight of the Fabricated Structural Steel.

- Indicates machine finish surface.

Shop drawings are not required for the lead plate and the preformed fabric pads.

Note: This drawing is not to scale. Follow dimensions.
