

Beyond The Barrels

Description and Benefit

Beyond the Barrels is a video series launched by MoDOT's *Improve I-70* program team to highlight the people behind Missouri's \$2.8 billion I-70 expansion, which adds a third lane in each direction and upgrades aging infrastructure for safety and efficiency. The series features MoDOT staff, contractors, consultants, and local leaders, showcasing their roles and perspectives while promoting work zone safety and community awareness. By keeping the public informed through YouTube, newsletters, and the program website, the series reduces customer inquiries, saves time and money, and fosters understanding of the project's progress. This ongoing initiative strengthens communication, enhances safety, and builds public trust throughout the life of the Improve I-70 program.
