These details are meant to be used as a starting point only. Modify as needed.

1. Taper front face as gradually as possible, while maintaining 6" minimum thickness of blockout at the end of the existing parapet. 2'-9" maximum taper length.
2. Holes may be shifted 12" closer to the end (8" instead of 20") to avoid attaching a rail post to the top of backwall. All other dimensions and reinforcement remain the same.

Notes:
- Work this sheet with Sheet No.
- For details of resin anchors, see Sheet No.
- Resin anchors shall be shifted or bent in field to clear one-inch diameter holes by at least 1/2 inch.
