RE: Request for Expression of Interest: Duchesne Dr. Reconstruction

Dear Consultant:

The City of Saint Charles has interest in securing professional services for work associated with:

Duchesne Dr. Reconstruction

The Duchesne Drive Reconstruction project will replace existing concrete pavement along Duchesne Drive. The pavement has deteriorated beyond repair and requires a full depth pavement replacement. The project will also provide additional grate inlets and storm sewers to improve drainage and reduce localized ponding.

The existing sidewalks are in poor condition, discontinuous, not in ADA compliance, and missing curb ramps. This causes the corridor to be largely unusable by pedestrians. There are no existing bicycle facilities along Duchesne Drive. The project provides a continuous sidewalk on the west side and an 8 foot wide shared use path on the east side. The shared use path will connect to other shared use paths along West Clay Street and Droste Road.

Tentative Project Schedule:

Design NTP – April 2023

Final PS&E – August 2024

Bid Opening – October 2024

Construction Completed – June 2026

The estimated total cost of this project is \$4,200,000

To be considered for this project your written response (mail or email, 2 written pages max.) must be received by no later than **2 p.m. on 11/16/2022**. In your letter please describe why you are interested in the project and why you feel that you are most qualified to complete the proposed project. After all responses are received City Staff will select the 3 most qualified firms based on scoring of your prequalification packet and your response letter.

The prequalification scoring will be based on the following criteria:

- Experience in work required
- Record of the firm accomplishing the work on other projects in the required time
- QA/QC Program
- Recent experience showing accuracy of construction project cost estimates

- Project Management Philosophy and Approach

The selected 3 firms will then be requested to submit a qualifications based Request for Proposal (RFP) on the project. These proposals will be ranked and the project will then be negotiated with the highest rated firm.

Additional information relating to the proposed project scope will be distributed during the RFP stage of this project solicitation including the Project Charter. Staff will not address project specific questions during the expression of interest solicitation but will during the RFP stage.

It is the responsibility of the consultant to ensure their prequalification packet is up-to-date. Updates or supplements to the prequalification packet that are to be considered in the current scoring will be accepted up to one week prior to the EOI submittal deadline. For information regarding the prequalification and consultant selection process, please refer to <https://www.stcharlescitymo.gov/608/Consultant-Information>.

It is required that your firm's Statement of Qualification (RSMo 8.285 through 8.291) be submitted with your firm's Letter of Interest, or be on file with the City of St. Charles. The statement of qualification is not included in the total page count limit. DBE firms must be listed in the MRCC DBE Directory located on MoDOT's website at [www.modot.gov](http://www.modot.gov), in order to be counted as participation towards an established DBE Goal. We encourage DBE firms to submit letters of interest as prime consultants for any project they feel can be managed by their firm.

The DBE PE Goal for this project is: **12%**

It is required that your firm be prequalified with MoDOT and listed in [MoDOT's Approved Consultant Prequalification List](#), or your firm will be considered non-responsive.

If your firm would like to be considered for this project, please submit a written Expression of Interest or email to the following contact:

Alex Weidenbenner  
Project Manager  
City of Saint Charles
