

---

**WARSON ROAD IMPROVEMENT PROJECT**  
**FEDERAL PROJECT NUMBER STP-5526(640)**  
CITY OF CREVE COEUR, MISSOURI

---

**ADDENDUM #1**  
JANUARY 16, 2018

---

Bidders are hereby instructed to make the following ten (10) changes to the Bid Documents, and to review the Request for Information included below as Item #10, for the project referenced above and to consider these changes when making a Bid for the work specified therein:

**Item #1:** Asphalt Pavement Repairs. A bid item has been created for "Full-Depth Asphalt Pavement Repair," and this item will replace Item 405-99.11 "Type X Bituminous Concrete (Base)." The quantity of repairs has increased to be an estimated 500 SY of repairs. A supplemental specification has been added to better describe this item.

Discussion: The addition of the Full-Depth Asphalt Pavement Repair item and the removal of the Type X Bituminous Concrete item are intended to more clearly describe the pavement repairs anticipated for the project. These changes will impact the Itemized Bid Form and will involve the addition of a supplemental specification, as summarized below in the Addendum Summary.

**Item #2:** Concrete Pavement Repairs. The scopes of the work for Item 613-99.03 "Concrete Joint Repair" and Item 613-99.05 "Full-Depth Concrete Pavement Repair" have been revised to increase the thickness of the repair to be a minimum of eight inches (8"), and the scope of each item has been clarified to indicate that the removals will be measured and paid according to the Removal of Rigid Pavement item.

Discussion: The revisions to this item are intended to clarify the City's expectations for the work. A supplemental specification has been included with this addendum.

**Item #3:** Removal of Rigid Pavements. The quantity for this item has been revised in the Request for Bid to more closely match the quantity shown on Sheet C2.1 of the construction plans and to account for the clarification of the removals of the concrete pavement repair items detailed in Item #2 above.

Discussion. This revision impacts the Itemized Bid Form.

Item #4: Utility Adjustments. Several bid items have been created related to the adjustment of water valves, gas valves, and manholes within the project limits. Supplemental specifications have been added to describe these items.

Discussion. These changes impact the Itemized Bid Form and involve the addition of several supplemental specifications, as summarized in the Addendum Summary.

Item #5: Concrete Pavement Thickness. The thickness of the concrete pavement repairs has changed from six inches (6") to eight inches (8"). This change will revise Item 502-11.06 "Concrete Pavement (6" Non-Reinforced)" to be Item 502-11.08 "Concrete Pavement (8" Non-Reinforced)."

Discussion. This change impacts the Itemized Bid Form. The change to the item is reflected in its name, so no supplemental specification will be provided to describe the new item.

Item #6: Driveway Items. Items have been added to account for the concrete driveway and asphalt driveway repairs. Supplemental specifications for these items have been included in this addendum.

Discussion: This change adds two bid items to the Itemized Bid Form and two supplemental specifications. The asphalt driveway work on this project is illustrated on the plans as resurfacing, but this work is anticipated to be driveway apron replacement instead. The asphalt driveway item will also be used for the extension of the Stacy Park bike path that was previously not accounted for.

Item #7: Curbing Items. As discussed in the Request for Information below, a review of the curbing items found that the quantity for Item 609-99.03 "6" Vertical Concrete Curb (Type A Integral)" and Item 609-10.10 "6" Vertical Concrete Curb (Type S)" were incorrect in the plans and in the Itemized Bid Form. The bid quantity for each has been changed in the revised Itemized Bid Form.

Discussion: A mathematical error was found on Sheet C2.1 of the construction plans in the quantity summary for 6" Concrete Curb (Type A Integral), where the total of the lengths shown adds to 234 LF instead of the 214 LF listed. Further, two sections of curb, totaling 119 LF, were attributed to curb ramps instead of to 6" Concrete Curb (Type S). This increases the Type S curb quantity from 276 LF to 395 LF.

Item #8: Curb Ramp Base Aggregate. The scope of work for Item 608-99.07 "Concrete Curb Ramp (7" Thick)" has been revised to include the four inches (4") of aggregate base. This change has been detailed in a supplemental specification for the project.

Discussion: With this change, the curb ramp item becomes easier to measure and pay.

Item #9: Aggregate Base Items. Item 304-05.00 "Type 5 Aggregate Base (4" Thick)" and Item 304-05.06 "Type 5 Aggregate Base (6" Thick)" have been deleted.

Discussion: Changes to the project specifications made by this Addendum eliminate the need for separate pay items for aggregate base. This change impacts the Itemized Bid Form by removing two of the bid items.

Item #10: Federal Wage Rates. The federal wage rates that apply to the project have been updated as of January 5, 2018, and these revised wage rates will apply to the project.

Discussion: The revised Federal Wage Rates replace those included in the original Request for Bids document.

Item #11: Request for Information. The City offers the following points of clarification related to questions about the project that were raised at the Pre-Bid Meeting for the project on Tuesday, January 9, 2018:

- 1) Materials Testing. The City will provide materials testing for aggregate base, concrete, and asphalt work. In addition to this testing, the City requires that the contractor provide asphalt testing services so that the contractor can best direct his staff to provide pavement that meets the specifications, such as the required asphalt density.
- 2) Private Facilities in the Right of Way. The Contractor will be required to repair any private facilities that are encountered and damaged along the project. Such facilities include underground irrigation systems and invisible dog fences, among others. More details regarding this requirement are included under General Contract Provision 5.2 on Page 41 of the Request for Bid document.
- 3) Warson Traffic Counts. The most recent traffic counts for Warson Road were measured in 2012, at which time the average daily traffic (ADT) was measured at 5,030 vehicles per day.

---

### Addendum Summary

---

The ten (10) changes included in this addendum and the request for information affect thirty-six (36) pages of the Request for Bid document, add one (1) page to the Request for Bid (page 12A of the Itemized Bid Form), and result in a Project Supplemental Specification document, as summarized below:

- Item #1: The addition of Item 401-01.03 Full-Depth Asphalt Pavement Repair item and the removal of Item 405-99.11 "Type 'X' Bituminous Concrete (Base)" impacts the Itemized Bid Form, and the details of this new item are included in the Project Supplemental Specifications. This addendum includes a replacement Itemized Bid Form (i.e. pages 7-12 of the Request for Bid). Bidders are instructed to use these replacement pages with their bid.
- Item #2: The changes to the scopes of work involved with Item 613-99.03 Concrete Joint Repair and Item 613-99.05 Full-Depth Concrete Pavement Repair are included in the Project Supplemental Specifications. Job Special Provision "S" is referenced but is otherwise not changed.
- Item #3: The clarification of the scope of work outlined in Item #2 and a correction of the quantity of rigid pavement to be removed has reduced the quantity for Item 202-99.05 Removal of Rigid Pavements to a total of 301.4 SY. This addendum includes a replacement Itemized Bid Form (i.e. pages 7-12 of the Request for Bid). Bidders are instructed to use these replacement pages with their bid.

- Item #4: The addition of the following four (4) bid items:
- Item 603-99.02 Adjust Water Valve
  - Item 603-99.32 Adjust Gas Valve
  - Item 604-20.10 Adjusting Manhole
  - Item 604-99.03 Rebuild Manhole
- Impacts the Itemized Bid Form and requires three (3) supplemental specifications. This addendum includes a replacement Itemized Bid Form (i.e. pages 7-12 of the Request for Bid). Bidders are instructed to use these replacement pages with their bid.
- Item #5: The change to the scope and name of Item 502-11.06 “Concrete Pavement (6” Non-Reinforced) to 502-11.08 “Concrete Pavement (8” Non-Reinforced)” impacts the Itemized Bid Form. This addendum includes a replacement Itemized Bid Form (i.e. pages 7-12 of the Request for Bid). Bidders are instructed to use these replacement pages with their bid.
- Item #6: Two items related to driveway replacement are added to the project, impact the Itemized Bid Form, and are included in the Project Supplemental Specifications. These items are:
- Item 608-50.06 Concrete Paved Approach (6” Thick)
  - Item 401-99.05 Asphalt Paved Approach (3” Thick)
- This addendum includes a replacement Itemized Bid Form (i.e. pages 7-12 of the Request for Bid). Bidders are instructed to use these replacement pages with their bid.
- Item #7: The changes to the quantities of the curbing items require revisions to the Itemized Bid Form. This addendum includes a replacement Itemized Bid Form (i.e. pages 7-12 of the Request for Bid). Bidders are instructed to use these replacement pages with their bid.
- Item #8: The addition of the base rock to the scope of work for Item 608-99.07 “Concrete Curb Ramp (7” Thick)” is detailed in the Project Supplemental Specifications. No revisions to Request for Bid result from this change.
- Item #9: The removal of the following items impacts the Itemized Bid Form:
- Item 304-05.00 Type 5 Aggregate Base (4” Thick)
  - Item 304-05.06 Type 5 Aggregate Base (6” Thick)
- This addendum includes a replacement Itemized Bid Form (i.e. pages 7-12 of the Request for Bid). Bidders are instructed to use these replacement pages with their bid.
- Item #10: The most recent Federal Wage Rates impact thirty (30) pages of the Request for Bid document. This addendum includes replacement pages for the Federal Wage Rate Determination section of the Request for Bid (i.e. pages 107-136). Bidders are instructed to consider these replacement pages with their bid.
- Item #11: The request for information does not change the bid documents.

**PROJECT SUPPLEMENTAL SPECIFICATIONS**

The following technical specifications supplement the Request for Bid and the Construction Plans for the Warson Road Improvement Project. In case of any conflict between any part or parts of these Supplemental Specifications and the Request for Bid and/or the Construction Plans, these Supplemental Specifications shall take precedence and shall govern.

**PROJECT SUPPLEMENTAL SPECIFICATIONS TABLE OF CONTENTS**

ITEM #604-20.10 – ADJUSTING MANHOLE ..... 2

ITEM #604-99.03 – REBUILD MANHOLE ..... 2

ITEM #401-01.03 – FULL-DEPTH ASPHALT PAVEMENT REPAIR ..... 3

ITEM #401-99.05 – ASPHALT PAVED APPROACH (3" THICK) ..... 5

ITEM #502-11.08 – CONCRETE PAVEMENT (8" NON-REINFORCED) ..... 6

ITEM #603-99.02 – ADJUST WATER VALVE ..... 7

ITEM #603-99.03 – ADJUST GAS VALVE ..... 7

ITEM #608-50.06 – CONCRETE PAVED APPROACH (6" THICK) ..... 9

ITEM #613-99.03 – CONCRETE JOINT REPAIR ..... 10

ITEM #613-99.05 – FULL-DEPTH CONCRETE PAVEMENT REPAIR ..... 10

**ITEM #604-20.10 – ADJUSTING MANHOLE**

**ITEM #604-99.03 – REBUILD MANHOLE**

Work under these items shall conform to the applicable provisions of Section 604.20 of the Standard Specifications, amended as follows:

**Section 604.20.1 Description.** Amend as follows:

Work under “Adjusting Manhole” shall include resetting manholes as necessary to match adjustments to the roadway grade or sidewalk grade as a result of construction. This work shall include reconstruction of up to one (1) foot of damaged manhole.

Work under “Rebuild Manhole” shall include the removal and replacement of deteriorated or damaged manhole walls to the depth determined by the Director of Public Works.

The Contractor shall be responsible for providing all materials required for the adjustment and/or rebuild of the manhole. Such materials may include (but are not limited to) steps, risers, bricks, and adjustment rings.

Work under this item shall not include repairs to structures damaged by carelessness during the Contractor’s operations, as determined by the Director of Public Works. The cost to repair damage to structures caused by the Contractor’s operations shall be the sole responsibility of the Contractor.

Materials and Construction Methods for this item shall be in accordance with the standards established by the Metropolitan St. Louis Sewer District (MSD). This work shall include any MSD inspections and/or permits necessary.

**Section 604.20.2 Basis of Payment.** Add the following:

“Rebuild Manhole” shall be measured and paid for at the contract unit price per vertical linear foot and shall include all all excavation, pervious material, backfill, removal, disposal of materials, blocks, bricks, mortar, and all other materials, equipment, tools, and labor incidental thereto.

<b>ITEM NO.</b>	<b>DESCRIPTION</b>	<b>UNIT</b>
604-20.10	ADJUSTING MANHOLE	EA
604-99.03	REBUILD MANHOLE	VLF

**ADDENDUM #1**

**ITEM #401-01.03 – FULL-DEPTH ASPHALT PAVEMENT REPAIR**

Work under this item shall conform to the applicable provisions of Section 401 of the Standard Specifications, amended as follows:

**Section 401.1 Description.** Add the following:

Full-Depth Asphalt Pavement Repair shall be constructed according to the Warson Road Asphalt Pavement Repair Detail shown in the Construction Plans, with the exception that the Contractor shall replace up to six inches (6") of unsuitable base material should this be deemed necessary by the Director of Public Works.

The pavement repair shall consist of the excavation of the existing pavement to a depth of ten (10) inches below the milled surface or to the base of the existing bound pavement, whichever is greater, plus the removal and replacement of six (6) inches of base material.

It is understood that this work will begin following the milling of Warson Road. The City will then mark out the areas to be repaired, and repairs will be made to the top of the milled surface. The construction of the asphalt driving surface will follow the patches and will be paid according to a separate item.

The work shall include all sawcut, excavation, and site preparations necessary.

**Section 401.2 Material.** Amend as follows:

The asphalt mix to be used shall be Bituminous Concrete Base mixture, or St. Louis County "Type X" bituminous concrete, or an equal asphalt mix that is approved by the Director of Public Works.

Aggregate base shall be Type 5 Aggregate Base, or an approved equal.

**Section 401.7 Construction Requirements.** Add the following:

If the base material is found to be in suitable condition, in the opinion of the Director of Public Works, it shall be compacted to the elevation that will allow for the installation of the intermediate pavement course thickness.

If the base material is found to be unsuitable by the Director of Public Works, then the base material shall be removed and replaced with Aggregate Base in accordance with Section 304 of the Standard Specifications. The Aggregate Base shall be installed to the elevation that will accommodate the necessary intermediate pavement course thickness.

**Tack Coat.**

Tack Coat material shall be applied to the vertical faces of the adjacent existing bound pavement as well as between the courses of bituminous pavement, as directed by the Director of Public Works. This material shall be in accordance with Item 407-10.95 Tack Emulsified Asphalt.

**Bituminous Pavement.**

Install the pavement patch in lifts of between 1.5" and 3" thickness.

Compact each lift to meet the compaction requirements of Section 401 for the bituminous mix specified. Patches that do not meet the density requirements may be ordered removed by

**ADDENDUM #1**

the Director of Public Works. The Contractor shall remove and replace deficient patches at no additional cost to the City.

No open excavations or partially completed patches shall be left open or uncompleted overnight. The pavement shall be cleaned and open to traffic at the end of each working day.

**Section 401.13 Method of Measurement.** Add the following:

This work will be measured for payment by the accepted number of square yards of “Full-Depth Asphalt Pavement Repair,” complete and in place. Measured limits of the “Full-Depth Asphalt Pavement Repair” shall be made to the outside limits of the 6” cut back of the existing bound surface, as specified in the field by the City.

There will be no direct measurement for payment of the sawcutting, excavation, disposal of materials, installation of processed aggregate base course, preparation of the patch, tack coating, and construction of the required depth of bituminous pavement patch. This work and material will be included in the unit price bid for “Full-Depth Asphalt Pavement Repair.”

**Section 401.14 Basis of Payment.** Add the following:

The furnishing and installation of “Full-Depth Asphalt Pavement Repair” shall be paid for at the contract price per square yard. The unit price shall include sawcutting, excavation, furnishing and installing processed aggregate base course, bituminous pavement, and tack coat in accordance with the specifications and as ordered by the Director of Public Works. Payment shall include all labor, materials, equipment, cleaning of pavement surface, material disposal, and incidentals necessary to complete the work described.

<b>ITEM NO.</b>	<b>DESCRIPTION</b>	<b>UNIT</b>
401-01.03	FULL-DEPTH ASPHALT PAVEMENT REPAIR	SY

**ADDENDUM #1**

**ITEM #401-99.05 – ASPHALT PAVED APPROACH (3” THICK)**

The Work shall comply with Section 401 of the Standard Specifications, amended as follows:

**Section 401.1 Description.** Add the following:

This work shall consist of constructing bituminous concrete driveway aprons and driveways according to the lines, grades, and dimensions specified in the plans and details of the Construction Plans, and at the locations indicated on the Construction Plans or as directed by the Director of Public Works.

**Section 401.7 Construction Requirements.** Add the following:

Existing bituminous driveways and driveway approaches shall be removed to provide sufficient depth to provide six inches (6”) of compacted aggregate base and three inches (3”) of the approved mixture of bituminous concrete.

The existing driveway shall be saw cut at the limit of the proposed work. Saw cuts shall be to the full depth of the pavement, cut at straight lines, and located as directed by the Director of Public Works.

The Contractor shall protect the existing driveway to remain and any existing drainage culverts underneath the driveway from damage or harm by construction operations. Any damage to the existing driveway to remain or existing drainage culvert that results from the Contractor’s actions shall be remedied to the satisfaction of the Director of Public Works and at the Contractor’s own expense.

The dimensions of the existing driveway and approach shall be maintained, as much as possible, with the new construction included in this Work, unless otherwise ordered by the Director of Public Works.

**Section 401.13 Method of Measurement.** Add the following:

This work will be measured for payment by the accepted number of square yards of “Asphalt Paved Approach (3” Thick),” complete and in place. The extent of each driveway repair shall be as indicated in the field by the City.

There will be no direct measurement for payment of the excavation, disposal of materials, installation of processed aggregate base course, and construction of the of asphalt pavement driveway apron. This work and material will be included in the unit price bid for “Asphalt Paved Approach (3” Thick).”

**Section 401.14 Basis of Payment.** Add the following:

The furnishing and installation of “Asphalt Paved Approach (3” Thick)” shall be paid for at the contract price per square yard. The unit price shall include excavation, furnishing and installing processed aggregate base course, bituminous pavement, and tack coat in accordance with the specifications and as ordered by the Director of Public Works. Payment shall include all labor, materials, equipment, coordination with the resident(s), material disposal, and incidentals necessary to complete the work described.

<b>ITEM NO.</b>	<b>DESCRIPTION</b>	<b>UNIT</b>
401-99.05	ASPHALT PAVED APPROACH (3” THICK)	SY

**ADDENDUM #1**

**ITEM #502-11.08 – CONCRETE PAVEMENT (8” NON-REINFORCED)**

The Work shall comply with Section 502 of the Standard Specifications, amended as follows:

**Section 502.1 Description.** Add the following:

Work under the Concrete Pavement (8” Non-Reinforced) item shall be completed at the entrances of Warrington Square and Warson Downs Road, as indicated on the Construction Plans, but such work shall be constructed to a depth of eight inches (8”) instead of the six inches (6”) referenced in the plans.

Residential concrete driveway aprons will be included under Item #608-50.06 Concrete Paved Approach (6” Thick).

<b>ITEM NO.</b>	<b>DESCRIPTION</b>	<b>UNIT</b>
502-11.08	CONCRETE PAVEMENT (8” NON-REINFORCED)	SY

**ADDENDUM #1**

**ITEM #603-99.02 – ADJUST WATER VALVE****ITEM #603-99.03 – ADJUST GAS VALVE**

**1.0 Description.** Work under these items shall include furnishing materials, equipment, and labor for the adjustment of utility valves within the project limits to meet the proposed grades at each location as ordered by the Engineer. This work includes the necessary coordination with the utility companies and customers as required.

**2.0 Materials.** All materials shall be provided by the Contractor and shall meet the current standards of the appropriate utility agency. Contact information for each utility with known facilities in the project limits can be found in JSP “D” Utilities in the Request for Bid.

**3.0 Construction Methods.**

3.1 The Contractor shall perform all work in coordination with the appropriate utility agency and the affected property owner, and as directed by the City Engineer.

3.2 Certain work may require use of a licensed and/or certified tradesman. It shall be the responsibility of the Contractor to meet any such requirements.

3.3 Service interruption shall be avoided, if possible. Any utility customer’s service interruption shall be done in a manner that minimizes adverse impacts to the customer and affected utility.

3.4 Any work and materials supplied by the utility company shall be on a billable basis to the Contractor.

3.5 Any damage resulting from the Contractor’s operations to the utility shall be corrected as ordered by the City Engineer, without additional compensation to the Contractor.

3.6 The Contractor shall adjust/lower service valves, boxes, and manholes to match the exposed aggregate grades where necessary to provide for safe traffic operations. Prior to paving operations, the Contractor shall adjust/raise these facilities to final pavement grades. Multiple adjustments of valves, boxes, and manholes shall not be measured for payment, but the adjustment shall be measured only once, regardless of the number of adjustments performed.

3.7 As noted in the plans there are existing manholes and valves located within the existing pavement and sidewalk. Regardless of type or size, the manholes and valves recorded in the documents require adjustment to match the grade of roadway, sidewalk or island. Any manhole or valve must be raised to match the finished surface. As noted in the plans depending on the owner of these facilities, either they are to be adjusted by the contractor, the utility owner or as directed by the engineer. The contractor should be aware that an estimated quantity is shown in the plans for the adjustments needed to manholes and valves. There may be additional valves and manholes. All of these manholes or valves may or may not need to be adjusted. All valves shall be adjusted as directed by the engineer.

3.8 As noted in this contract there are valves that require adjustments. In the event that the utility is unable to meet the schedule to adjust these valves to grade the contract shall as directed by the engineer adjust the valves. Any adjustments shall be done in accordance to the approved method per the owner of said valve. The quantity of valves to be adjusted by the contract is an estimated number of the total quantity of valves located within the project limits.

**ADDENDUM #1**

**4.0 Method of Measurement.** Adjustment to grade of the various utility valves and boxes will be measured for payment per each valve or box adjustment completed and accepted by the Engineer. Where multiple adjustments of an item are required, this work shall be measured for payment only once, regardless of the number of adjustments performed.

**5.0 Basis of Payment.** This work will be paid for at the contract unit price for each valve or box adjusted to grade, completed and accepted in place, which price shall include all materials, equipment, tools, labor, and expenses incidental thereto.

No additional payment shall be made for coordination with utility companies or for any delays caused by such coordination.

<b>ITEM NO.</b>	<b>DESCRIPTION</b>	<b>UNIT</b>
603-99.02	ADJUST WATER VALVE	EACH
603-99.03	ADJUST GAS VALVE	EACH

---

**ADDENDUM #1**

---

**ITEM #608-50.06 – CONCRETE PAVED APPROACH (6” THICK)**

The Work shall comply with Section 608 of the Standard Specifications, amended as follows:

**Section 608.1 Description.** Add the following:

Work for this item shall be according to the “Residential Concrete Pavement Detail” on Sheet C2.0 of the Construction Plans.

**Section 608.3 Construction Requirements.** Add the following:

Existing concrete driveways and driveway approaches shall be removed to provide sufficient depth to provide four inches (4”) of compacted aggregate base and six inches (6”) of the concrete approach.

Concrete approaches and driveways are to be constructed without steel reinforcement.

The existing driveway shall be saw cut at the limit of the proposed work. Saw cuts shall be to the full depth of the pavement, cut at straight lines, and located as directed by the Director of Public Works.

The Contractor shall protect the existing driveway to remain and any existing drainage culverts underneath the driveway from damage or harm by construction operations. Any damage to the existing driveway to remain or existing drainage culvert that results from the Contractor’s actions shall be remedied to the satisfaction of the Director of Public Works and at the Contractor’s own expense.

The dimensions of the existing driveway and approach shall be maintained, as much as possible, with the new construction included in this Work, unless otherwise ordered by the Director of Public Works.

**Section 608.4 Method of Measurement.** Amend as follows:

Removal of existing concrete paved approach shall be measured separately according to the Removal of Rigid Pavements item.

**Section 608.5 Basis of Payment.** Add the following:

Breaking, removing, and disposing of existing concrete paved approach shall be measured and paid according to the Removal of Rigid Pavements item.

<b>ITEM NO.</b>	<b>DESCRIPTION</b>	<b>UNIT</b>
608-50.06	CONCRETE PAVED APPROACH (6” THICK)	SY

**ADDENDUM #1**

**ITEM #613-99.03 – CONCRETE JOINT REPAIR****ITEM #613-99.05 – FULL-DEPTH CONCRETE PAVEMENT REPAIR**

The Work under these items shall comply with Job Special Provision “S” (Pavement Repairs) of the Request for Bid, amended as follows:

**1.0 Description.** Add the following:

1.2 Full-Depth Concrete Pavement Repair and Concrete Joint Repair shall be made to the thickness of the existing surrounding pavement or eight inches (8”), whichever is greater.

**4.0 Payment.** Add the following:

4.1 Removals for Concrete Joint Repair and Full-Depth Concrete Pavement Repair will be measured and paid according to the contract unit cost per square yard of Removal of Rigid Pavements.

<b>ITEM NO.</b>	<b>DESCRIPTION</b>	<b>UNIT</b>
613-99.03	CONCRETE JOINT REPAIR	SY
613-99.05	FULL-DEPTH CONCRETE PAVEMENT REPAIR	SY

GROUP 4.....	\$ 23.74	24.87

POWER EQUIPMENT OPERATORS CLASSIFICATIONS

GROUP 1: Asphalt finishing machine & trench widening spreader, asphalt plant console operator; autograder; automatic slipform paver; back hoe; blade operator - all types; boat operator tow; boiler two; central mix concrete plant operator; clam shell operator; concrete mixer paver; crane operator; derrick or derrick trucks; ditching machine; dozer operator; dragline operator; dredge booster pump; dredge engineman; dredge operator; drill cat with compressor mounted on cat; drilling or boring machine rotary self-propelled; highloader; hoisting engine 2 active drums; launchhammer wheel; locomotive operator standrad guage; mechanics and welders; mucking machine; piledriver operator; pitman crane operator; push cat operator; guad-trac; scoop operator; sideboom cats; skimmer scoop operator; trenching machine operator; truck crane, shovel operator.

GROUP 2: A-Frame; asphalt hot-mix silo; asphalt roller operator asphalt plant fireman (drum or boiler); asphalt plant man; asphalt plant mixer operator; backfiller

operator; barber-greene loader; boat operator (bridge & dams); chip spreader; concrete mixer operator skip loader; concrete plant operator; concrete pump operator; dredge oiler; elevating graded operator; fork lift; grease fleet; hoisting engine one; locomotive operator narrow guage; multiple compactor; pavement breaker; powerbroom self-propelled; power shield; rooter; slip-form finishing machine; stumpcutter machine; side discharge concrete spreader; throttleman; tractor operator (over 50 hp); winch truck; asphalt roller operator; crusher operator.

GROUP 3: Spreader box operator, self-propelled not asphalt; tractor operator (50 h.p. or less); boilers one; chip spreader (front man); churn drill operator; compressor over 105 CFM 2-3 pumps 4" & over; 2-3 light plant 7.5 KWA or any combination thereof; clef plane operator; compressor maintenance operator 2 or 3; concrete saw operator (self-propelled); curb finishing mancine; distributor operator; finishing machine operator; flex plane operator; float operator; form grader operator; pugmill operator; riller operator other than high type asphalt; screening & washing plant operator; siphons & jets; subgrading machine operator; tank car heater (combination boiler & booster); ulmac, ulric or similar spreader; vibrating machine operator; hydrobroom.

GROUP 4: Oiler; grout machine; oiler driver; compressor over 105 CFM one; conveyor operator one; maintenance operator; pump 4" & over one.

FOOTNOTE: HOURLY PREMIUMS

- Backhoe hydraulic, 2 cu. yds. or under Without oiler - \$2.00
- Certified Crane Operator - \$1.50;
- Certified Hazardous Material Operator \$1.50;
- Crane, climbing (such as Linden) - \$0.50;
- Crane, pile driving and extracting - \$0.50;
- Crane, with boom (including jib) over 100' from pin to pin add \$0.01 per foot to maximum of \$4.00;
- Crane, using rock socket tool - \$0.50;
- Derrick, diesel, gas or electric, hoisting material and erecting steel (150' or more above the ground) - \$0.50;
- Dragline, 7 cu. yds, and over - \$0.50;
- Hoist, three or more drums in use - \$0.50; Scoop, Tandem - \$0.50;
- Shovel, power - 7 cu. yds. or more - \$0.50;
- Tractor, tandem crawler - \$0.50;
- Tunnel, man assigned to work in tunnel or tunnel shaft - \$0.50;
- Wrecking, when machine is working on second floor or higher - \$0.50;

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.  
=====

Note: Executive Order (EO) 13706, Establishing Paid Sick Leave for Federal Contractors applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2017. If this contract is covered by the EO, the contractor must provide employees with 1 hour of paid sick leave for every 30 hours they work, up to 56 hours of paid sick leave each year. Employees must be permitted to use paid sick leave for their own illness, injury or other health-related needs, including preventive care; to assist a family member (or person who is like family to the employee) who is ill, injured, or has other

health-related needs, including preventive care; or for reasons resulting from, or to assist a family member (or person who is like family to the employee) who is a victim of, domestic violence, sexual assault, or stalking. Additional information on contractor requirements and worker protections under the EO is available at [www.dol.gov/whd/govcontracts](http://www.dol.gov/whd/govcontracts).

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

-----

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of "identifiers" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

#### Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than "SU" or "UAVG" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

#### Survey Rate Identifiers

Classifications listed under the "SU" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

-----  
WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- \* an existing published wage determination
- \* a survey underlying a wage determination
- \* a Wage and Hour Division letter setting forth a position on a wage determination matter
- \* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations  
Wage and Hour Division  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Warson Road Improvement Project  
STP-5526(640)

Administrative Review Board  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

ADDENDUM #1

4.) All decisions by the Administrative Review Board are final.

=====

END OF GENERAL DECISION
