

SAFETY IMPROVEMENTS PROJECT A LIFESAVING PARTNERSHIP

TYPES OF SAFETY IMPROVEMENTS

Retroreflective Backplates

Multiple intersections received backplates & signal ahead signs before approaching the intersection for visibility.

High Visibility Crosswalks

Multiple locations in the City of St. Louis received upgraded crosswalks & ADA Curb ramps

Pedestrian Push Button

New pedestrian signal heads were installed with countdown timers.

UPGRADES

A round of pedestrian improvements have been installed at 15 intersections in the City of St. Louis and St. Louis County, as part of the SL Safety Improvements Project. These improvements included modifying the signal timing to provide pedestrians with a head start for crossing the street before any of the signals turn green. High-visibility crosswalks, ADA compliant curb ramps, and new pedestrian crosswalk timers in at intersections that required upgrades.

For drivers, intersections received retroreflective backplates on all signal heads and intersections like Page & Hanley Rd, Gravois & Compton Ave now have a protected left turn signal phase (green arrow) instead of a flashing yellow arrow.

MODIFIED RIGHT TURN ANGLES

Starting the week of December 16, drivers in various parts of St. Louis County and Jefferson County may see some roadway improvements intended to enhance or increase how far drivers can see when they make a right turn.

This will be increasing safety for drivers and pedestrians as they make their turn. Construction involves restriping the right-turn curve paving markings and this will a few days at each location.

ADA Upgrades will be implemented at various locations along with the right-turn modifications.

All work is weather dependent. For a list of locations, visit www.modot.org/types-safety-improvements

MONTHLY IMPROVEMENTS BY LOCATION

Intersections		Upgrade 1	Upgrade 2	Upgrade 3
115	11TH ST	Install "Signal Ahead" oversize warning signs	Change Signal Phasing to protected only	Retroflective Backplates
D	HANLEY RD	Install "Signal Ahead" oversize warning signs	Retroflective Backplates	Change Signal Phasing to protected only
30	LOUGHBOROUGH AVE	Modify signal timing to add LPI	Retroflective Backplates	ADA Curb Ramp
