

Route 47 Missouri River Bridge Project Washington, MO

Why is a new bridge needed?

The current Route 47 Missouri River Bridge needs to be replaced due to its deteriorating condition. The narrow bridge has no shoulders and a restricted weight limit. The bridge is a vital link for both Franklin and Warren Counties with about 11,000 vehicles a day using it.

Current Route 47 Missouri River Bridge

What is the proposed design for the the new bridge?

The new bridge will be located just west of the existing bridge. It will have two, 12-foot lanes with ten-foot shoulders. It will also have a ten-foot bike/pedestrian path that will connect to the KATY Trail in Warren County. The estimated cost of the new bridge is \$43 million.

Rendering of the new bridge

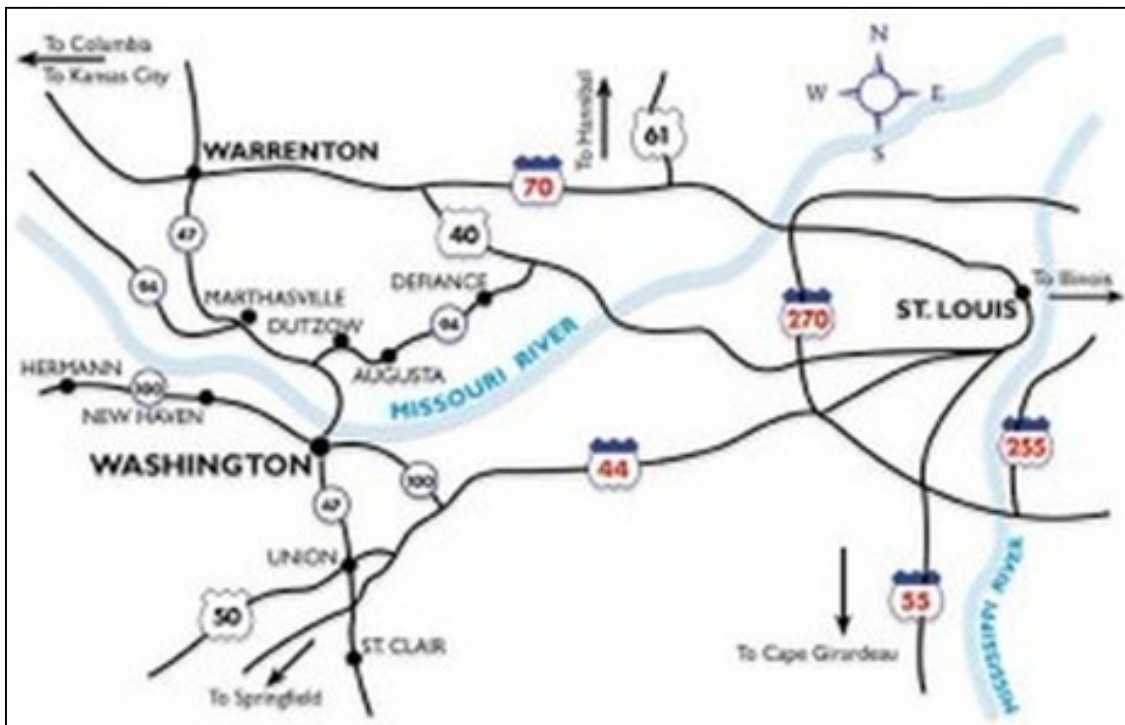

What is the proposed construction schedule?

Construction is expected to begin later this year and be completed in 2019.

- Bid Opening - May 2016
- Contract Awarded - early summer 2016
- Construction Begins - early summer 2016
- Project Completion - 2019

Where is the bridge located?

Washington, Missouri is approximately 50 miles west of downtown St. Louis. It is at the junction of Route 100 and Route 47 and is only an hour drive from downtown St. Louis via Interstate 44 or 70

Workforce Diversity Information

The Department of Labor workforce goal established for Franklin County is **14.7%** minority and **6.9%** female per craft/trade. The goals for Warren County are **11.4%** minority and **6.9%** female.
