

DO NOT DISTURB

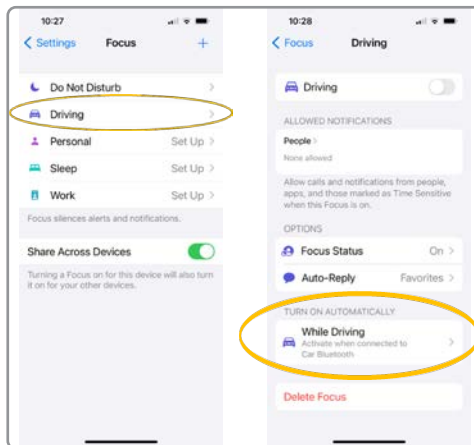

Taking your eyes off the road for just 2 seconds doubles your chances of being involved in a crash. To prevent driving distracted, here's how to turn on your **"Do Not Disturb While Driving"** setting (DNDWD) on your smartphone.

For an iPhone

For iOS 15, open Settings and select Focus.

Select "Driving" from the Focus menu and select "Activate automatically"

If your car has Bluetooth, select "When Connected to Car Bluetooth."

DNDWD turns on when you phone connects to your car. If you car does not have Bluetooth, select "Automatically." DNDWD turns on when your phone detects you are driving. If you have Apple CarPlay, slide the "Activate with CarPlay" toggle switch to the right/green position.

DNDWD will silence notifications and you will be able to use the CarPlay interface in your car.

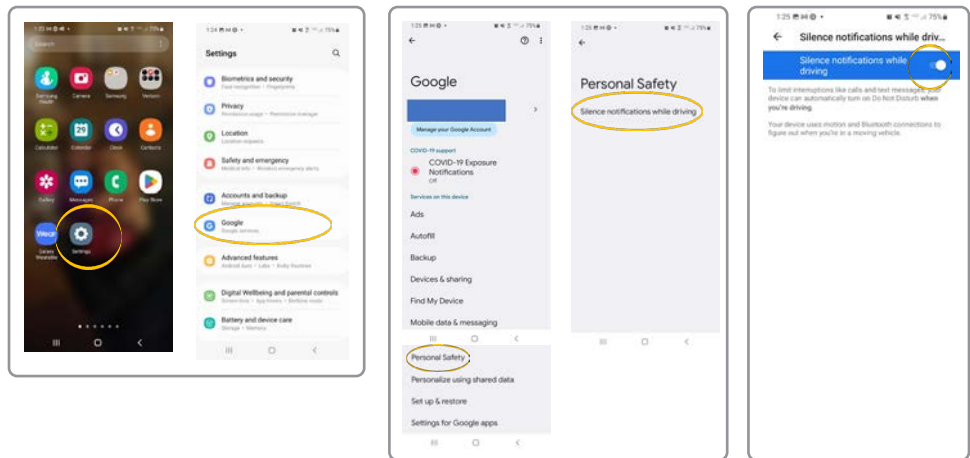

For a Samsung Galaxy

Easiest Automatic Option:

- Select "Settings"
- Select "Google: Google Services"
- Scroll to and Select "Personal Safety"
- Select "Silence notifications while driving"
- Slide the toggle switch to the right

The phone uses motion and Bluetooth connections to determine when you're in a moving vehicle.

DNDWD via Android Auto:

- Select "Settings"
- Scroll down and select "Advanced features"
- Select "Android Auto"
- Scroll down and select "start Android Auto Automatically"
- Select "Always."
- Scroll to Notifications and slide the four toggle switches to the "off" (grayed-out) position to hide conversations and mute chimes.
