

Tool and Equipment First-Round Winner

Innovations Challenge

April 2018

Prepared by Transportation Planning
Missouri Department of Transportation

Flagger Cone

Description

The Flagger Cone has the top of a channelizer attached to the tip of a flagging cone.

Benefit

Using the Flagger Cone makes the maintenance employee's job easier and safer. Employees avoid the repetitive motion of bending over to pick up a cone while flagging. It also enables the employee to keep an eye on the traffic instead of looking down to reach for the cone.

Materials and Labor

No materials cost with 20 minutes of staff time.
