

Route 160 Improvements from West Plains, MO to Oregon County

DETAILS

The proposed project includes widening at the Route BB intersection, widening two box culverts, adding edgeline rumble stripes from Allen St. in West Plains to Route 99, and overlaying Route 160 from Business 63 to Route 99. Widening at Route BB will include adding a right turn lane on Route BB and an acceleration lane to merge onto Route 160, as well as a concrete median with a stop sign at Route BB. The two box culverts are located just east of Allen St. and will include guardrail upgrades.

TIMELINE

Tentatively, construction could begin as early as spring 2023, with completion anticipated in late summer 2024.

TRAFFIC IMPACTS

Route 160 and Route BB will be reduced to a single lane at times with flaggers during the construction.
