PROJECT DETAILS

Why is this work needed?

The Missouri Route 163 (Providence Road) bridge over Hinkson Creek in Columbia, is scheduled for a replacement of the northbound bridge deck (driving surface) in 2027. Built in 1968, the supporting structures are in good condition, but the northbound driving surface is in poor condition and in need of replacement.

Proposed improvements

- New, smoother driving surface.
- Replacing current railings with new barriers.
- Installing new pavement marking.
- Installing new approach pavement.

Traffic Impacts

Providence Road is expected to remain open during construction. Traffic will be maintained in both directions by shifting all vehicles onto the southbound bridge, which will carry two lanes of southbound traffic and one lane of northbound traffic.

All lanes of traffic are expected to be open to traffic by mid-August 2027.

Current Proposed Timeline

Dec. 2026: Contractors submit competitive bids.

Jan. 2027: Missouri Highways and Transportation Commission may award contract.

Feb. 2027: If awarded in December, earliest contractor may begin work.

Dec. 2027: Anticipated project completion.
